THIRTIETH ANNUAL REPORT

—OF THE—

State Board of Education,

—SHOWING THE CONDITION OF THE—

Public Schools of Maryland,

—FOR THE—

Year Ending July 31, 1896

BALTIMORE, MD.
PRINTED BY KING BROTHERS,
1897.

STATE OF MARYLAND.

OFFICE OF THE STATE BOARD OF EDUCATION.

BALTIMORE,

To His Excellency Lloyd Lowndes,

Governor of Maryland:

SIR—I have the honor to transmit to you the Annual Report of the State Board of Education for the fiscal and school year ending July 31, 1896, with accompanying documents, as required by law.

Very respectfully,

Your obedient servant,

E. B. PRETTYMAN,

Secretary.

REPORT

—OF THE—

State Board of Education.

The following summary, in connection with the accompanying tables, exhibits, in a condensed form, the most important facts connected with the administration of the public school system of the State, for the fiscal and school year ending in the city of Baltimore, December 31, 1895, and in the counties, July 31, 1896.

The several items are compared with the corresponding items for 1894, in the city of Baltimore, and for 1895, in the counties:

Number of schools in Baltimore city	185	
" " the counties	2,204	
Total		2,389
Being an increase in 1896 of 56		
Number of different pupils, city	89,752	
" " " counties	129,610	
Total		219,362
Being an increase in 1896 of 14,618		
Highest number enrolled in one term, city	62,868	
" " " " " counties	116,479	
Total		179,347
Being an increase in 1896 of 3,117		
Average number in daily attendance, city	50,680	
" " " counties	72,547	
Total		123,227
Being an increase in 1896 of 1,665		

Number of teachers, city	1,667	
" " counties	2,949	
Total		4,616
Being an increase in 1896 of 103		
Number of months schools were open, city	10	
" " " " counties	8.7	
Average for the State		9.1
Being an increase for the State of 0.06 of one month.		
Receipts from all sources, city	$1,109,652 40	
" " " counties	1,230,965 21	
Total		$2,340,617 61
Being a decrease in 1896 of $8,723 44		
Amount paid for teachers' salaries, city	$955,340 60	
" " " " counties	835,400 22	
Total		$1,790,740 82
Being an increase in 1896 of $61,058 38		
Amount paid for building, repairing and furnishing school houses, city	$311,333 95	
Amount paid for building, repairing and furnishing school houses, counties	95,308 61	
Total		$ 406,642 56
Being an increase in 1896 of $156,245 36		
Amount paid for books and stationery, city	$60,497 68	
" " " " counties	47,768 91	
Total		$108,266 59
Being a decrease in 1896 of $1,579 77		
Amount paid for rent, fuel and other incidentals, city	$74,907 52	
Amount paid for rent, fuel and other incidentals, counties	74,927 16	
Total		$149,834 68
Being an increase in 1896 of $7,190 46		
Total expenses for public school purposes, city	$1,419,300 38	
" " " " " " counties	1,230,965 21	
Total		$2,650,265 59
Being an increase in 1896 of $261,984 26		

Excluding the city of Baltimore, the county schools show the following results:

Number of schools	2,204	
Increase in 1896		50
Total number of scholars enrolled	129,610	
Increase in 1896		3,141
Highest number enrolled in one term	116,479	
Increase in 1896		2,272
Average number enrolled	106,295	
Increase in 1896		1,235
Average number in daily attendance	72,547	
Increase in 1896		1,247
Number in first grade	31,065	
Increase in 1896		1,109
Number in second grade	19,315	
Increase in 1896		822
Number in third grade	20,770	
Increase in 1896		216
Number in fourth grade	20,314	
Increase in 1896		3,616
Number in fifth grade	14,593	
Increase in 1896		1,082
Number in sixth grade	8,310	
Decrease in 1896		752
Number above sixth grade	4,493	
Increase in 1896		279
Number studying book-keeping	2,403	
Decrease in 1896		312
Number studying algebra	6,696	
Increase in 1896		458
Number studying philosophy	3,509	
Decrease in 1896		25
Number studying drawing	27,928	
Increase in 1896		454
Number studying geometry	2,875	
Increase in 1896		77
Number studying physiology	19,571	
Increase in 1896		297

Number of teachers, (including assistants)—		
Men—white, 715; colored, 208; total	923	
Women—white, 1,707; colored, 319; total	2,026	
Total		2,949
Increase in 1896	62	
Average number of months schools were open		8.7
Increase of 0.1 of one month		
Amount received from State school tax, (white schools,) free school fund and academic donations	$335,560 40	
Decrease in 1896		$12,188 86
Amount received from State school tax appropriated to colored schools	$92,375 80	
Increase in 1896		$43.88
Amount received from county tax	$568,253 25	
Increase in 1896		$28,269 87
Amount paid for teachers' salaries	$835,400 22	
Increase in 1896		$19,149 38
Amount paid for building, repairing and furnishing school houses	$95,308 61	
Decrease in 1896		$10,669 77
Amount paid for books and stationery	$47,768 91	
Decrease in 1896		$614 12
Amount paid for supervision and office expenses	$45,584 22	
Increase in 1896		$4,680 61
Amount paid for incidental expenses, including fuel and rent	$74,927 16	
Increase in 1896		$3,998 36
Amount paid for interest	$10,145 69	
Increase in 1896		$1,531 53
Amount paid for miscellaneous expenses	$5,914 34	
Decrease in 1896		$11,358 32
Amount of indebtedness paid	$73,086 80	
Increase in 1896		$366 12
Total expenses for the public school purposes in the counties	$1,188,135 95	
Increase in 1896		$7,083 79

The items of expenditure which show an increase are:

Teachers' salaries	$19,149 38	
Supervision and office expenses	4,680 61	
Incidental expenses, fuel and rent	3,998 36	
Interest	1,531 53	
Indebtedness paid	366 12	
Total		$29,726 00

The items which show a decrease are:

Building, repairing and furnishing	$10,669 77	
Books and stationery	614 12	
Miscellaneous	11,358 32	
Total		$22,642 21
Showing a net increase of expenditure in 1896		$7,083 79

STATE TABLES.

STATE TABLES.

The State tables annexed present the usual summary of interesting facts.

Table "A" shows the population of Maryland by counties and the number of white and colored, according to the census of 1890.

Table "B" shows the population between 5 and 20, and the quarterly distribution of the State school tax to the white schools of the several counties and the city of Baltimore.

Table "C" shows the colored population between 5 and 20, and the quarterly distribution of the State school tax to colored schools of the several counties and the city of Baltimore.

Table "D" shows the assessed value of the property subject to taxation in the several counties, with the amounts, as "State School Tax," "Free School Fund," "Academic Fund," "Appropriation to Colored Schools" and "County School Tax."

Table "E" shows receipts from all sources, with the totals (including balances carried over.)

Table "F" shows the expenditures of the several counties under the items of teachers' salaries, incidental expenses, books and stationery, building, repairing and furniture, supervision and office expenses, miscellaneous, interest, indebtedness paid, with the balance on hand and the totals.

Table "G" shows the number of pupils in the primary grades, and the number studying special branches.

Table "H" shows the number of schools in each county, the number of months schools were open, the number of teachers, male and female, the number of different pupils,

the average number of pupils enrolled and in attendance, and the highest number enrolled in one term.

Table "I" shows the cost of the colored schools and the statistics (under the same heads as those mentioned in Table "H") of the colored schools separately.

Table "K" shows the receipts from all sources for colored schools (including balance carried over.)

Table "L" shows the expenditures for colored schools under the heads mentioned in Table "F."

Table "M" gives the statistics of the several colleges receiving State donations, and of the State Normal School.

Table "N" gives the statistics of the several schools and academies receiving State donations.

The county reports give in detail the enrollment and the average attendance for each term, and the expenses of each individual school, under the heads of rent, fuel, repairs, incidentals, furniture, blackboards and stoves, books, and teachers' salaries. Every citizen can thus know what the school in his district has cost, and may become the auditor of the accounts. It is believed that no State in the Union furnishes a similarly minute detail of expenses.

REPORT

OF THE

SECRETARY.

REPORT OF THE SECRETARY.

The summary included in the report of the State Board of Education, and the State tables immediately following, give a comprehensive view of the condition of the public schools during the last school year, ending July 31, 1896. The statistical reports of the Board of Commissioners of Public Schools of Baltimore City, and of the School Commissioners of the several counties of the State, present, in minute detail, the facts concerning the schools, and show the receipts and disbursements for their support. The statements of the several County Examiners will doubtless be read with great interest.

A copy of the following circular was mailed to each County Examiner in the State:

OFFICE OF THE STATE BOARD OF EDUCATION.

BALTIMORE, MD., *January 20th, 1897.*

DEAR SIR—I am instructed by the State Board of Education to request that you forward to this office, for use in making up the Annual Report of the Public Schools of Maryland, a supplementary report, answering the following questions concerning the public schools in your county:

(1.) What is the general condition of the Public Schools in your county, as to attendance, buildings, furniture, outbuildings; and as to public interest in the schools, the corps of teachers and the progress and improvement of the schools?

(2.) How many high schools are there in your county?

(3.) How many school libraries are there in your county, and what is your estimate of the whole number of volumes in such libraries?

The statistical part of the annual report is in the hands of the printer, and I shall be obliged if you will forward such supplementary report to me, by February 10, 1897.

Very respectfully yours,

E. B. PRETTYMAN,

Secretary of the State Board of Education.

The following are the supplementary reports which have been received, omitting from each the formal opening and closing:

ALLEGANY COUNTY.—*H. G. Weimer, Examiner.*

CUMBERLAND, MD., *February 8th, 1897.*

The schools of Allegany county have passed a prosperous year. We have reason to believe that more interest is shown by the public generally in our public schools than ever before.

The teachers of the county, as a rule, are alive to the interest and duties pertaining to their work. Taking into consideration sickness, bad roads, &c., pupils have been regular in their attendance.

Of late years much improvement has been made in school buildings and furniture throughout the county, and poor school houses and furniture are not now the rule, but rather the rare exception, and it is to be hoped that ere long we will not have any exception.

Nearly all our school buildings have two separate and distinct out-buildings, entirely separate each from the other, and the approaches are separated by a substantial partition.

Many citizens showed such interest, and gave such support to the schools as to make them stronger and better. Every community should stir up and awaken an educational sentiment, which will have a strengthening and refining influence upon its schools, for it is difficult for a teacher to raise her school much above the sentiment of the community in which the school is located.

Upwards of twenty-five Public School Libraries have been started in the county. Estimate of the whole number of volumes in said libraries is about four thousand.

ANNE ARUNDEL COUNTY.—*F. Eugene Wathen, Examiner.*

ANNAPOLIS, MD., *February 8th, 1897.*

In connection with the statistical report of the public schools of Anne Arundel county, heretofore forwarded to you, I beg leave to submit the following remarks in response to the questions contained in your letter of January 20th, 1897.

General Condition.

The general condition of the public schools of the county shows marked improvement. The attendance which has been gradually increasing for years, took a sudden jump when the free book system went into effect. I estimate that the attendance of the schools since their opening in September, will show an increase of fully twenty-five per cent. over that of the first two quarters of last year. The attendance in nearly every school of the county has increased, and in some the increase has been exceptionally large, particularly in some of the colored schools, where second, and even third orders for books, as large, and in some cases larger than the first order, have been sent in. Some of these orders were so exceptional that I made a personal investigation before filling them. I found that the books were really needed, and that the increased attendance was due to the free books. I discovered that a number of families, which before the advent of free books, had only sent one child to school, are now sending five and six. I have always believed and contended that the public schools should be so conducted as to place all children attending them upon the same footing before the law; and my experience with free books has confirmed me in my belief. I think the system should be extended so as to include all school supplies.

The past two years have been noted in the matters of school building, repairs and furnishings. During this period schools have been built, repaired and furnished as follows:

In the first district, one new colored school has been built and furnished, and a large addition has been made to one white school.

In the second district, two new white schools have been built and furnished, one white school repaired, and an addition made to one colored school, at about half their original costs.

In the third district, three new white schools and one colored school have been built and furnished, a large addition made to one white school, and two schools, one white and one colored, have been painted and repaired, and one white school which burned down has been rebuilt and refurnished at a cost of about $400.

In the fourth district, two new schools, one white and one colored, have been built and furnished.

In the fifth district, one colored school has been built and furnished, and one white school, the school at South Baltimore, (Curtis Bay) has had an addition made to it, larger than the original building, the cost of which will, with furniture, exceed $3,000.

In the sixth district, (Annapolis,) in accordance with chapter 275 of the Acts of 1896, a large and handsome building, equipped with all modern conveniences, is now in course of construction. This building, in pursuance to the provisions of said Act is being constructed by Morrow Bros., contractors, under the supervision of Joseph Evans Sperry, architect, and the following building committee: Messrs. Samuel Jones, Frank H. Stockett, Jr., Richard H. Phelps, Frank B. Mayer, Joseph H. Bellis and F. Eugene Wathen. Eighteen thousand dollars were appropriated to erect and furnish this building. Of this amount, the city of Annapolis has contributed $6,000, and the School Commissioners $12,000, they having, in accordance with said Act, sold $12,000 of their bonds, upon which a handsome premium was realized. The contractor hopes to have the building completed by Easter. It will certainly be completed in time for the opening of school next September. A modern school building has long been a crying need in Annapolis, where the public school has for years been conducted in an old dwelling house entirely unsuited for the purpose, and whose sanitary conditions have been a constant menace to the health of teachers and scholars. Efforts have been made from time to time to provide means for the erection of a modern school building. It was one of the cherished plans of my predecessor, the late John C. Bannon, who succeeded in having an appropriation of $30,000 made for this purpose by the Legislature of 1894. The city of Annapolis resisted the payment of the $10,000 provided in that Act to be contributed by it, and carried the case to the Supreme Court of the United States, where it was pending when the Act of 1896 was passed as a compromise. The new building, when completed, will be a credit to the city and county, and a source of great comfort to teachers and scholars.

In the eighth district, one new, white, school has been built and furnished.

In addition to these extraordinary expenses, the usual and ordinary expenses of repairs and furniture have been met. Every school which belongs to the county is provided with proper out-buildings, a number of which have been constructed within the past year.

The above is an evidence of the lively interest our people take in their public schools, and their desire to have as many and as good schools as possible for their children. Our teachers are faithful, conscientious and efficient, and will compare most favorably with those of any county of the State. Their work is good, and the results, while not all that could *theoretically* be desired, is probably all that can *practically* be accomplished. Before leaving this branch of my remarks, I desire to make a suggestion which I believe, if adopted, will result in great good to the school system of the State. It is, that the State make an appropriation for school building and furniture, to be apportioned as the general school fund and the free school book fund now are, and that the School Commissioners be prohibited from using it for any other purpose, as they are now prohibited from using the free book fund. The current expenses of the schools are constantly increasing in response to modern demands and modern educational methods, and they will, assuredly, grow greater as the years go by. There is, I am sure, no county in the State which is not feeling this demand upon its school resources. Likewise, there is, I believe, no county in the State which does not need school buildings and furniture. The local school tax which the counties now pay, is about as much as they are able to pay, and certainly it is as much as they ought to be reasonably expected to pay. It is the duty of the State to provide for the education of its children, and a fund for school building and furniture as large as the free book fund, which, I think, would be amply sufficient, could be appropriated without serious hardship to anyone, unless to fiscal officers of the State who desire to make a good showing for the debt of the State.

High Schools.

We have no school, except the Annapolis school, which can distinctively be called a high school. This school, under its present efficient principal and corps of teachers, is now doing the work of a high school, and it is the hope and expectation of the school authorities of the county to make it, when the new building is completed and occupied, rank with the best high schools to be found anywhere.

The schools at South Baltimore, (Curtis Bay) and Brooklyn, it is hoped will also shortly take rank as high schools. Our people have given but little thought or consideration to high schools, and have rather inclined to the view that con-

venient, properly equipped and good district schools were to be preferred to high schools, particularly in view of the fact that the school fund is barely sufficient to provide proper district schools.

School Libraries.

Very little attention has been paid to the matter of school libraries for several years. Some years ago these libraries were established in many of the schools of the county, but most of them have been dissipated.

I have no information of record as to the exact number of these libraries now existing in the schools and the county. There are probably not over a half dozen of them in the county, and none of them contains probably over one hundred volumes.

I am of opinion that a school library should be in every school, and that they should be started with the best dictionary obtainable and a good encyclopedia. Our school houses, however, are being constantly broken into, and no doubt this fact has had much to do with causing our people to lose interest in school libraries. They do not know at what time their school houses may be broken into, and the books obtained by them at much trouble and cost, be stolen or destroyed.

BALTIMORE COUNTY.—*Charles B. Rogers, Examiner.*

Towson, Md., *February 8, 1897.*

In compliance with your request for a supplementary report, I respectfully submit the following:

It is the aim of the public school officials of Baltimore county so to conduct their schools that the youth of the county, under earnest teaching and skillful guidance, may become thoughtful, self-reliant men and women. It is the conviction of this board that the aim of education is the strengthening and building up of the reasoning-power; we believe that the only way to build up the reasoning-power is through the processes of thought. Believing that the habit of thought is formed in the early school life of the child, we insist that teachers teach with the why and wherefore; we do not favor the teaching that drifts the child toward dependence on memory, and we are not satisfied with the ability to do unless it carries with it ability to explain.

The public schools of Baltimore county, taken as a unit, are doing their work well, up a grade of easy rise toward an aim that is well defined. Our school houses are, with few exceptions, commodious and comfortable; they are in a fair state of repair and well supplied with all necessary equipment. Recognizing that the value of education lies in the development of the reason, our teachers' examinations have for years been conducted along such lines as in our judgment are best calculated to test the thinking power of those examined. Without good teachers good schools can not be, and the wisest expenditure of money in the management of school affairs is therefore such a schedule of teachers' salaries as will open up the largest field for selection. Our children are promoted not on the ability to do but on the ability to explain, and we believe that we rightfully feel proud of the progress of our children and of the general condition of our schools. Baltimore county has one high school, which opened with the scholastic year; this school, under the name of a graded school, has so long and so successfully been working in high school work that its success is assured. Twenty-six of our schools have libraries, the number of volumes contained being 1,869.

CALVERT COUNTY.— *William C. Somervell, Examiner.*

PRINCE FREDERICK, MD., *February 3, 1897.*

Your letter in regard to a supplementary report of the public schools of Calvert county received, and in reply, in answer to first question, as to attendance will say that it has been better than I expected it could be, or in other words, knowing the circumstances of a large majority of the children who attend school, and knowing they have "at certain seasons" to be kept at home to help their parents, I would say that the attendance has been very good. The buildings, furniture and out-buildings, I would say that the school board has been very strict in regard to care of same, and say from my own observation that they are all comfortable and most of them are in first class condition.

There is no more interest, so far as the public is concerned, taken in any schools than those of this county. And so far as to the corps of teachers, I take it, we can not be excelled in the State, most of our teachers are ladies, quite a number

graduates from the Normal School, and so far as my humble judgment is concerned, they are the best in the State.

So far as the progress and improvement in the schools is concerned, I will say that I am perfectly satisfied, that nothing more could be done than the corps of teachers which we have are doing, and therefore progress must go on.

Question 2. There are no high schools in county.

Question 3. There are no school libraries.

CAROLINE COUNTY.—*M. B. Stephens, Examiner.*

DENTON, MD., *February 6th, 1897.*

Your favor of January 20th, requesting supplementary remarks, in addition to our statistical report, containing answers to certain questions proposed by the State Board of Education concerning the public schools of this county, is at hand, and beg leave to submit the following remarks in compliance with such request:

1. (*a.*) The condition of our schools, in respect to enrollment of pupils, is best shown by giving the general population according to the census of 1890, which was 13,903, and the enrollment of different pupils for the scholastic year ending July 31st, 1896, which was 4,066. From this exhibit it appears that twenty-nine per cent. of the whole population attend our schools, which I find to be greater than obtains in any other county of the State. Our School Commissioners have contributed largely to this good showing, not only by providing necessary and comfortable school houses, but by personal effort aimed directly along this line. During the past few years we have sent to our teachers letters on two different occasions directing them to visit, if possible, each family in their respective districts where there were children of school age who were not pupils under our instruction, and to use their best efforts to have them avail themselves of the educational privileges within their reach. In cases where the efforts of the teachers were futile, the names of such parents were forwarded to our board, whose members supplemented the teachers' exertions with direct appeals to such parents in behalf of their children's best interests. In several cases it was found that a lack of necessary clothing kept the children from school, but it can be said to the credit of such communities in question, that in every case this need was supplied and such children attended school during the past year.

These facts are cited to show that a well directed effort in this direction by school officers and teachers make it possible not only to swell the enrollment of pupils, but to bring the maximum number of children of school age within range of an education, in the absence of a compulsory law. (*b.*) As regards the *average attendance* of pupils it will be seen by comparison that there is, from year to year, a perceptible increase; but the showing is still far from being satisfactory. Our teachers have directed much thought and energy against the evil of irregular attendance, which is so deleterious in its consequences, but I regret the results obtained are not commensurate with the efforts put forth. When all our teachers become efficient in every phase of school work; when every pupil is aroused to a proper appreciation of school privileges; when parents can discern the true armor with which it is necessary to clothe their children in order for them to fight the battles of a busy life successfully and become persuaded that they can not *afford* to have their children attend school in a haphazard sort of way, irregular attendance will be reduced to a minimum, and not until these conditions prevail. (*c.*) Our *school houses* are highly creditable. The time our schools remain open is not consistent with the character of our school buildings; for, while it is unusual for us to maintain our schools longer than eight months, we claim to have the highest percentage of attractive and comfortable school buildings of any county in Maryland.

During the past twelve years one-half of our school houses have been built anew, at a cost of over thirty thousand dollars, and with few exceptions all our buildings are well adapted to their intended purposes, and are ornaments to their respective localities. They are supplied with modern furniture and necessary school apparatus, and are provided in nearly all cases, with suitable out-buildings. The large amount spent annually in building and repairing school houses has kept our school year down to eight when otherwise it would be nine months. (*d.*) During my incumbency as School Examiner, I have been seriously impressed with the need of "*greater public interest*" in educational matters. I am likewise convinced that the lack of proper public interest in our schools is chargeable to a large extent to the agents of the school system. No question of public importance is more far reaching in its results than that of educating our boys and girls for intelligent citizenship. It is not a matter which merely touches the pockets of our taxpayers; but when

neglected or allowed to suffer through public indifference, it affects the integrity of our State, blights the educational polity of our communities and impairs the usefulness of those who are meant to be the recipients of its manifold benefits. In view of its importance, it is surprising how parents can be derelict to this duty when they are under moral and legal obligations not only to maintain but *educate* their children. It is an open secret, however, that the efficiency of our schools has been crippled by this very lack of public interest. There must be a complete reconciliation of the people who support public education to the aims and methods of those who are directly the custodians of its interests, if we would attain the best results from our system of public schools. If the people are rightly advised of the factors which stamp the progress of public education, and become convinced of the reasonableness and superiority of our plans intended to make school work effectual, their apparent indifference, and in a few cases open hostility, will be turned into active support. The responsibility for thus informing the people falls upon our teachers and county school officers whose labors will be antagonized in proportion as they neglect this duty. During the past five years a great many public school meetings have been held in our county, where it has been our privilege to talk to patrons concerning their relations to the schools. We have found them, without an exception, eager to learn what the law expects of them, and willing to live up to such requirements. We regret that such a meeting has not been held in every school district, for it is noticeable that infractions of the school law and unpleasant wrangles between local authorities and patrons come from those localities where no such meetings have been held. A school examiner ought to conduct at least ten public school meetings each year, which instead of increasing his work will lessen it, paradoxical as this statement may seem. (*c.*) "The corps of teachers" in this county is more efficient than the comparatively small salaries indicate. When it is remembered that our county is surrounded by those where much larger salaries obtain, it is evident that we are at a serious disadvantage to command the best skill in the teaching profession. Because of this we have in some of our schools incapable teachers, whom we would be glad to exchange for those who possessed additional qualifications to that for holding a certificate. But the majority are sincere and devoted workers who are earnestly striving to raise public school

work to a higher standard. I find them ready to avail themselves of all opportunities to widen their knowledge and increase their usefulness as teachers. (*f.*) It is somewhat difficult to speak of the "progress and improvement in the schools." When we look back several years we can see that public education has made commendable progress even in our county, where school appropriations are limited and where the amount received per pupil is less than for any other county in the State. We are dependent for our revenues on State and county appropriations solely, and with a great many schools and a small assessable basis we are unable to keep our schools open long enough or to pay our teachers better salaries. In spite of these disadvantages our teachers seem determined to keep in the front ranks and they have achieved splendid results, when we consider the attendant circumstances. Our schools are well graded and the work of the pupils, as shown by the two public examinations held each year, is satisfactory. We are driven to the necessity of trying to accomplish in eight months the amount of work outlined for a school year of nine or ten months, and it is surprising how successfully many of our schools do it. Our county school board awards diplomas to all pupils who complete satisfactorily the ninth grade studies, and this plan has stimulated interest in the higher grade studies and has steadily increased the number in that grade. This departure has been especially gratifying to our school officials.

2. We have but one high school in our county, which is located in Denton, the county seat. The County Commissioners make a small appropriation annually for its maintenance. It has been well attended and we find the facilities too small for the demands. Two more rooms are needed that the work of the school may be more efficient, inasmuch as the vice-principal is required to teach several studies which do not properly belong to a high school curriculum. I hope to see the time come when our board can erect a suitable high school building, the need of which is keenly felt.

3. We have forty-five "school libraries" in our county, containing five thousand choice reading books and valuable reference books. Our schools have excelled in the formation of school libraries as there are but five white schools without them. As we gave our views at length on this topic in our report for last year, we will not burden you with a repetition.

CARROLL COUNTY.—*George W. Davis, Examiner.*

My report for the school year ending July 31, 1896, will give you the details of the operations of the public schools of Carroll county. Supplementary thereto, I desire to say that our school buildings are, with few exceptions, in good condition. Of the 117 houses owned by the county, 100 will rank from good to excellent, eight are fair, and nine will soon have to be rebuilt. Including those rented and loaned, our houses are well supplied with the necessary out-buildings.

Our total enrollment of pupils for the year was 6,097, being an increase of sixty-six over the year ending July 31, 1895. Our average attendance was about 61 per cent. of the enrollment. This is in no wise attributable to a lack of interest on the part of our teachers or patrons, but rather to the remoteness from and the inconvience in getting to the schools in the country districts during the winter months. With few exceptions, our school houses are well and comfortably furnished, and our schools under the care of competent and efficient teachers. From time to time, as our resources permit, our Board is furnishing our schools with wall maps, charts, etc. It is to be regretted that our school patrons have not manifested a greater interest in the formation of libraries for their respective schools, ten school districts only having one each, and comprising in all about 1,000 volumes.

CECIL COUNTY.—*George Biddle, Examiner.*

ELKTON, MD., *February 1, 1897.*

Replying to your circular of January 20th, it gives me pleasure to say that our schools were never in better condition than at this time.

During the past few years our examinations for teachers have been steadily raised in grade, growing each year more exacting, until they compare favorably with those of our neighbors. Some of our teachers who are from the States of Delaware and Pennsylvania, state that our examinations are more difficult than those of the above named States.

In our white schools we can persue this course, as we have a full supply of teachers; but in our colored schools, where we employ colored teachers, as they are in closer touch with the children, we are not so fortunate, and often cannot secure

teachers of as high a grade as we desire. Among them, however, there is a marked advance.

We offer some inducement to our teachers in the way of higher salaries for higher grade certificates. For the same grade of certificate we pay the same salary to male and female, white and colored.

The teachers are alive as to their work, and have reason to rejoice over the results, as the schools show marked improvement.

During the past twenty years we have erected many new houses, four this year, until our buildings are generally in good condition and well adapted to their locality, though we still have two or three that should be replaced by new ones; and I regret to say that we rent three.

Nearly all are furnished with the new improved desks and solid slate black-boards, and all have outbuildings.

The number on roll is large, 504 more pupils in the fall term than during the same term of any preceding year; the average daily attendance, however, could and should be improved, and how to do this is a matter that demands serious consideration.

In many of our schools, classed only as public schools, the higher branches, such as physics, algebra, geometry, book-keeping, &c., are being taught with success.

During the past summer we have erected the "Cecil County High School," at Elkton; a brick building on a granite foundation, with seven rooms beside the halls, with steam heat, water and all conveniences, at a cost of about $12,250. Students who have passed the sixth grade of our public schools, are entitled to admission. It was opened October 1st, 1896, and has about eighty students, who, when they graduate, will be prepared for the sophomore year of any of our colleges or as teachers of our schools.

Many of our schools have the larger dictionaries and reference atlases. Sixteen have libraries with 757 volumes, largely works of reference.

The people are alive as to school work; all have an encouraging word and are ever ready to help on the good cause. You had as well touch their pocket books as to say ought against the cause of education.

We hold "Teachers' Institutes" annually, one for the white and one for the colored teachers. We deem this better, as the teachers in each are more disposed to take an active part.

You and your corps from the Normal School have attended these institutes, rendering us very efficient aid, for which we tender our sincere thanks. The crowd in attendance at each session, filling the large hall to overflowing, tell much more forcibly than any words of mine, of the deep interest of people and teachers in the work. As they follow each other the interest deepens, they improve in the character of the work and the results that follow.

A good result would follow if we had one trustee instead of three, and that one associated with the Commissioner who represents the district in the appointment of teachers, and all appointments to be based on merit, and merit alone.

In closing, permit me to refer to Francis S. Everist, who died January 13th, in the sixty-first year of his age. For twenty-eight years he had been a member of our board, most of the time its president. A man more zealous in the cause of education never lived. With him it was a labor of love. It will be difficult indeed to fill his place.

CHARLES COUNTY.—*Thomas M. Carpenter, Examiner.*

La Plata Md., *January 25, 1897.*

The Annual State Report which I have had the honor to transmit to you, bears evidence of our straightened circumstances, but I beg to say not from any mismanagement on the part of our school officials, but from a reduction in the State distribution and an increased number of schools. However, notwithstanding these circumstances we have been able to keep the schools open about eight months in the year, and at the same time have noted considerable increase in the attendance of pupils, also many improvements in the houses and furniture, and creditable results from the year's work of the Board, Examiner and teachers.

We have now eighteen school libraries, containing about two hundred and fifty volumes, an increase of seven over last year. This increase is due to the untiring efforts of the teachers alone, whose zeal in this respect must merit applause. Finding that the school board was unable to render them aid, they have resorted to a series of school festivals and entertainments, where an admission fee was charged, and sometimes they receive private contributions. The good work has been gradually extending; it is to be hoped that at no distant date,

the finances may be in a better condition, that the aid for which they are sadly in want, may be forth coming.

DORCHESTER COUNTY.—*James L. Bryan, Examiner.*

CAMBRIDGE MD., *February 2, 1897.*

In answer to your circular of January 20, I submit the following response:

(1.) The condition of the public schools in our county, as to attendance of pupils is partly shown in the columns of enrollment and actual attendance as seen in the Annual Report of the Dorchester County Schools.

While the average attendance is not as great in proportion to the enrollment, as it is in Baltimore city and some counties of the State, yet it is creditable to our county, when one considers the large territory provided with schools, although not in areas of four square miles as contemplated in the school law. Such provision would require 200 white schools and as many colored, while the actual numbers are 81 white and 33 colored. Attendance is reduced in rural districts by reason of farm work, oyster catching, etc., bad roads and bad weather. The houses are still inadequate to the needs of the schools, and in many cases are not suitable for the work, poorly built and with little regard to their use for educational purposes. Most of the houses are supplied with blackboards and double desks of old styles. There is almost total absence of wall maps, globes and other apparatus.

While the general public interest in the schools has greatly increased within the last ten years, yet as our resources have almost as steadily declined, there has been no possibility of increasing ordinary school necessities, except by the gradual reduction of teachers' salaries. Any one acquainted with the necessities of good school work will see how such action, by reducing the number of the better class of teachers and substituting inferior ones, so as to make the funds hold out for all the schools, must be followed by work of an inferior quality.

There is no doubt that after the assessment has been completed and the amount to be obtained under it is known, there will be action on the part of the people of this county to obtain sufficient funds for all reasonable expenses of the schools.

At the proper time the question of increasing the State school tax, if necessary, so as to provide salaries for all the teachers of the State, and to leave to county provision, the cost of houses, furniture and other incidentals, will be brought forward and generally discussed, previous to the meeting of the Legislature of 1898.

2. High Schools, Academies, &c.

High schools as contemplated in the school law, chapter XVII, do not exist in this county, and yet, by the assistance of the school board, four institutions of a high grade, receiving State appropriations, are conducted in the towns of Cambridge, East New Market and Vienna, to which pupils may be sent, free of charge. These institutions occupy houses belonging to the School Board, which also assists in the payment of the salaries of the principals and all salaries of assistant teachers, and without such help they could not exist one month, and yet the school board has no control over them, and has nothing to do with the appointment of the principals, each of these academies having self-continuing boards of trustees, with power of appointment of principal.

There is, in fact, but one fair and reasonable arrangement of the control and management of such institutions, and it is in the transfer of the appropriations now given to these institutions by the State, to the proper representatives of the State in the several counties, their Boards of County School Commissioners. A simple repeal of the few remaining laws establishing these institutions, with the transfer of the appropriations to the School Boards, continuing the obligation of academic or high school work in the original location, would be all that is necessary, and such action would be unobjectionable, just, conservative and wise.

3. School Libraries.

It is to be regretted that all efforts to establish libraries in all of our schools have failed. Such efforts have been made and good working plans suggested, but in many localities want of interest and excuses of want of means have defeated all efforts to make these additions to the school work general.

Still there are several creditable collections of books in the academies, and some other schools in the county. The whole number of books exceeds one thousand volumes.

Conclusion.

The date February 10, 1897, at which time these additional reports must be in hands of the State School Board, recalls

to my mind the date of my first report to the State Board of Education.. It was in February, 1867, just thirty years ago, and the comparison of the schools in the two reports is as follows, and is creditable to the State and county by showing the steady growth of the schools during this long period of time. In the report of 1867, Dorchester county had 51 schools, 51 white teachers, no colored; white pupils in average attendance, 1706. Total attendance of white pupils, 2,337; of colored pupils, none.

In the report of 1896, Dorchester county had 111 white schools and 44 colored; total, 147. Total white pupils, 3,859; total colored pupils, 1831; total number of pupils, 5,690; *increase* white pupils, 1,522; increase colored, 1,831.

This comparison of numbers is encouraging, and no doubt other counties can make equally or more gratifying ones.

There is a sad feature though in these comparisons, in the knowledge that of all the Presidents of School Boards in 1867, it is likely that I am the only one left.

The State Board of Education in 1867 was composed of Thomas Swann, Governor, C. C. Cox, Lieut. Governor, John M. Frazier, Speaker House of Delegates, Rev. L. Van Bokkelen, State Sup. Pub. Inst., M. A. Newell, Principal Normal School.

A like fatality has befallen this Board. The success which has attended the noble work of which they were the founders will ever be a monument to their honored memory.

FREDERICK COUNTY.—*Ephraim L. Boblitz, Examiner.*

FREDERICK, MD., *January 29, 1897.*

In answer to your letter of 20th inst., asking for answers to questions 1, 2 and 3, I would reply:

1. The general condition of the schools in Frederick county is good. The enrollment for the Fall term, 1896, shows a gain of 688 over the corresponding term for 1895. The average daily attendance for the same term was 501 in excess of the corresponding term for 1895.

The county is fairly well supplied with comfortable houses and out-buildings with the exception of a few localities, and new furniture is gradually being supplied in place of the old. The people generally are interested in the schools, our teachers are, with a few exceptions, faithful and efficient, and the schools are making fair progress.

2. There are now seven high schools in the county.

3. Thirty schools possess libraries. Probably the entire number of volumes does not exceed two thousand.

GARRETT COUNTY.—*U. G. Palmer, Examiner.*

OAKLAND, MD., *February 8, 1897.*

In response to your letter of inquiry dated Jan. 20, I herewith submit the following facts relative to the educational status of Garrett county.

There are no high schools in the county. Outside of Oakland (the public schools of which at present have an enrollment of over 300) there is no school employing more than one assistant.

We have three district libraries, all of which were started last year, one at Oakland, one at Hutton and one at the Fairsweep school in E. D. No. 7.

Our school system is in its infancy. There is doubtless no other county in Maryland in which the public schools are maintained at such a sacrifice on the part of the patrons, and with the condition of which our law makers are so little acquainted. Our county is new and undeveloped. Its valleys are separated from each other by numerous and high mountains. In area, it is the largest in the State. It is thinly settled and we are poor. Many schools are necessary and often they are small, making the cost per pupil per month higher than the average of the State. There is a constant pressure for more schools too, because there are boys and girls within our bounds, growing to manhood and womanhood, who are entirely out of reach of a school.

Our county levy for school purposes is the highest rate in the State, and we receive under the present distribution of the State School Fund, the lowest cost per pupil of any county—a condition which results in from 4 to 5 months of school, per year.

This year the County Commissioners have appropriated $4,000 extra, which will enable us to keep our schools open full five months. We feel this is imposing too great a burden on our taxpayers. When any county pays the highest rate in the State and then does not have the funds necessary to keep the schools open 7½ months, State aid ought to be available to make up the deficiency; for it is certainly the paramount

duty of the State to educate its children, to make out of them good scholars and good citizens.

Our people are enterprising and interested in our schools, but there is a limit to our ability to do. We feel that any relief that we get must come from the State, and we only ask that we be treated with fairness. To illustrate. This year, of the amount distributed for the purchase of free books, we received less than 45 cents per pupil, while several counties received more than three times that amount, and in many instances the colored children received twice that amount. Is there any reason why it should cost less than 45 cents to buy the books for a white child in Garrett and more than $1.50 in other counties? Or should the colored children of some counties receive from the State more than twice as much as the white children of Garrett, for the purchase of books? And the same pertinent questions apply to the distribution of the State School Tax—questions that must be solved before Garrett can take her place beside the other counties of the State in educational attainments.

Many of our school houses are entirely unfit for use—in fact, we have twenty to twenty-five today that are utterly worthless—and young ladies have often lost their health in teaching in them, facts known to the school authorities, to say nothing of the health of the pupils, of which we have means of learning but very little.

Yet in spite of all of these disadvantages, we feel that we are living in an age of progress and that the trend of our schools is upwards. While the school year is short and the salaries low, still we have many excellent teachers, who continue in the profession in the county, year after year, hoping for better things. What inducement is there for a person to train himself professionally for a teacher when the reward is five months or less of service per year at $25 or $30 per month?

In conclusion I would say that the cry of Garrett is for *more money*, and when we can have three full school terms per year, all the secondary questions pertaining thereto will work out their own solutions.

HARFORD COUNTY.—*John D. Worthington, Examiner.*

BELAIR, MD., *February 1, 1897.*

In reply to your inquiry I will state that the school year ending July 31, 1896, was one of substantial success as a

whole, with quite as few drawbacks as we may reasonably expect in the practical working of so large a system. When we reflect that *all* of our children seek their primary, grammar school and academic education through this channel, and that an intelligent Board of County Commissioners voices the sentiment of their constituents by levying for public school purposes all the money this Board estimates will be the minimum amount for the proper maintenance of the system, we have much to congratulate ourselves upon as compared with many other sections of this and neighboring States.

The enrollment for the past year shows some, and the average attendance (a much better guide) shows a healthy increase over past years.

It is needless to say that the latter is and probably always will be far below what we could wish; but it will always be necessarily much lower in the country than in the city, and lower in a county having ten months of school, than in one having from five to eight months.

Our school buildings are fair generally, as such buildings go, but with over one hundred schools, there will always be pressing need of new buildings to meet the needs of new conditions of population, etc., as well as ordinary wear and tear.

In this line we are pleased to say that a long felt need of suitable accommodations for the Havre de Grace school has just been solved by the erection of the best public school building in the State outside of the city of Baltimore, and at a very reasonable cost. So well pleased is this Board as well as the citizens of Havre de Grace, that it gives us pleasure through the State report to invite an inspection of it by any board which contemplates the erection of a model town school building.

It is very agreeable to state that it was designed by Miss Anna L. Hawkins, who was the first female graduate in the State from the Maryland School of Arts and Designs.

Furniture is generally modern and in fair condition. The jack-knife is no longer the avowed enemy of a boy's desk; indeed, I can recall only one instance of wilful mutilation of school property recently in this way.

As an incentive towards better average attendance and more thorough day-to-day preparation of school work, the following rules were formulated and put into operation the first of last September:

1. A weekly recitation mark shall be given in each study by such a method as the teacher may prefer.

2. If a child is absent from school for a whole week his mark for the week shall be zero, unless said week's work is made up by extra recitations.

3. Adding together the marks till the end of the half year and dividing by the number of weeks will give the recitation mark for that half year.

4. Combining this with the examination mark, each to count half, will give the pupil's standing in the study for the half year.

5. If a child does not enter prior to January 1 in the first half of the year, or before May 1 in the last half, his standing for that half year shall be determined by his examination mark alone.

6. A minimum of 60 per centum in each study with a general average of 75 per centum is required for promotion.

7. If a teacher marks for attendance or deportment, such mark shall not be counted in obtaining the general average to determine promotion.

Without exception, our teachers report that the effect so far has been along the line the rules were intended to establish, what the effect will be on promotions can not be decided for six months to come.

There are three academies in the county, run under the management of this board, where the course is distinctively that of a high school; but every school in the county has the possibilities of high school work in English and mathematics, and many of them are doing very creditable work along these lines.

There are over forty district libraries in the county, which I suppose in the aggregate contain about 8,000 volumes; the libraries have not increased in size and number for two or three years as they did before, because of the enforced economy required of all agricultural sections, but they are valuable adjuncts of a country school, and are answering well the purpose for which they were organized.

It will probably be long before our schools measure up to the standard an ambitious, progressive, intelligent people have established in their minds, but we are indulging the fond hope that they are at least running a winning race in the onward march of civilization.

HOWARD COUNTY.—*L. M. Shipley, Examiner.*

ELLICOTT CITY, MD., *February 8th, 1897.*

In compliance with your request for supplementary report to the annual statistical report from Howard county, the following is respectfully submitted:

1. The two terms already completed show a decided increase of attendance of pupils over last year, perhaps to the extent of five per cent, although the usual diseases of childhood have been unusually prevalent.

So far as can be generalized at present, the anticipated increase of attendance of colored children under free books will not be fully realized.

The necessity of vaccination is the cause of non-attendance to some extent among our colored population. The part of the law requiring vaccination in one year after birth, although penal in its character, is very frequently ignored by both white and colored people, and further neglected until the children apply for admittance to the schools.

Most of our school houses are good and substantial structures, adapted to the purpose intended. A few, though better than *ante bellum* buildings, are not in keeping with current progress. Several houses used for colored schools are the merest make-shift, evidently far back numbers of the nineteenth century. The School Board is endeavoring to make substantial improvement in the matter of better buildings, while guarding against inferior material, workmanship and construction, believing that true economy demands building well, where houses are for the future as well as for present needs. Too many of our older houses are going to decay, because of foundations being laid on the ground instead of well and deep into it. The frost is crumbling and tilting such walls past remedy, and rotting of sills soon follows where such foundations are entirely too low. In some cases, strange to say, houses from twenty to twenty-four feet in width, have been built with no centre wall under the floor —an unpardonable oversight.

The furniture is generally good and modern. Two or three white schools have antiquated furniture. Most of the colored schools have furniture about like what the white schools had before 1860, some have much better. Our Board is making very important advance in replacing old wooden and wall black-boards with the best natural slate. In this

work the people are generously co operating in bearing a part of the cost.

Out-houses have been improved the past year and are now nearly as good as desirable.

Public interest in the schools is healthy and on the increase as manifested in various ways.

Howard county would like to boast of as efficient a corps of teachers as can be found in Maryland. They are efficient and zealous in many cases out of proportion to the salary received.

The Board would rejoice were it possible to increase salaries, could it be done without augmenting the already heavy burden of the taxpayer. Yet it is a source of gratification that a dollar in cash now is equal in purchasing power to half as much more twenty years ago when salaries were not much higher.

2. No high school, in the technical sense, has been established in Howard county. The original appropriation for that purpose having been merged, by special Act of the Legislature, into the common school fund; yet, the high grades department in the Ellicott City and other schools, supplies most of the essentials of a high school proper.

2. Only about one-tenth of the schools have established circulating libraries. These are of very limited extent, not containing more than, possibly, two hundred volumes.

MONTGOMERY COUNTY.—*Cooke D. Luckett, Examiner.*

ROCKVILLE, MD., *February 9, 1897.*

In response to the request of the State Board of Education, as conveyed in your communication of January 20th, I hereby forward a report covering matters touching public schools of Montgomery county. The attendance of both white and colored schools, for Fall term, 1896, exceeds that for same term, 1895, by over 10 per cent. The attendance of both white and colored schools for Winter term exceeds that of the Fall term of 1896, by over 20 per cent., the increase in white attendance being over 11 per cent., and that in colored schools being over 33 per cent.

The school buildings, excepting a few for colored pupils, are very comfortable and in fair condition; although two school houses were wrecked by the cyclone, and many others damaged.

The furniture is, generally good; in a large number of houses, it is new. The out-buildings are in good condition.

The public interest is greatly awakened and enhanced, as is evidenced by the unprecedented increase in attendance and by the active and generous co-operation of parents with the school authorities. In the corps of teachers, will be found earnest and industrious workers performing their duties with commendable zeal and encouraging success; and the marked progress and improvement discernible throughout, must be gratifying to all who have regard for the education of the masses.

There are two high schools doing excellent work: one at Rockville and one at Comus.

There are 26 libraries in the public schools; the volumes therein aggregate 1,869.

PRINCE GEORGE'S COUNTY.—*Thomas Stone, Examiner.*

AQUASCO, MD., *January 25th, 1897.*

In reply to yours of January 20th, I would respectfully state:

That the condition of the public schools for white children is good.

The buildings are generally in good repair and comfortable.

They are, as a rule, plain structures with vestibule on gable of main building. A few of the houses are of modern style, and also ornamental. All buildings are furnished with Soper desks, maps of Maryland and United States, with slate on walls.

The rooms are rendered attractive by simple devices of teachers, generally by pictures and mottoes, with curtains at the windows. All is done that is possible to present a pleasing and attractive appearance.

The out-buildings, generally three to each school, are in fair condition, and are kept neat and clean, that is, as far as it can be done by the persistent efforts of school authorities.

The attendance is very large from the 1st of October until about the 15th of May. The total annual attendance, as is shown by the table of statistics, is large.

The feeling here is very favorable to public schools, and the demand for greater school facilities is imperative.

Nearly every school for white children (there are 57 buildings with 73 rooms) has a small library of from 20 to 100 volumes.

There is strictly speaking no high school in this county, but in all the schools for white children all of the grades from the first to the seventh are taught, and in several of the schools, where assistant teachers are employed, all grades, from the first to the ninth are taught. In a few of the schools the ninth grade is found.

Most of the buildings for colored children are old and of an inferior character, but all of them are in fair repair and comfortable. They are furnished as the buildings for white children, and where new buildings have been erected, they are on same plan and style as those for white children.

The small salary available for these schools often render it impossible to secure the better class of workers. The county levies no money for colored schools, and the small State appropriation of $7,635.49, is inadequate to run the twenty-eight schools which we have here, and erect new buildings as they are needed.

The Colored Teachers' Association have a small library, but the schools, so far as I know, have none.

The corps of teachers for the white schools is, I honestly believe, second to none in the State. The teachers are progressive and intelligent, as is shown by their earnest work in the school room and at teachers' meetings. They are truly doing a good work for the county and State.

The corps of colored teachers is not equal perhaps to that of some other counties where better salaries are paid, but as a rule they are honest in their efforts and are doing fair work.

We hope in time to do more for our colored schools, but the progress must necessarily be slow from the want of means. At the present time the colored schools are overcrowded, and a teacher has often more work than can be done properly.

QUEEN ANNE'S COUNTY.—*Louis L. Beatty, Examiner.*

CENTREVILLE, MD., *January 25, 1897.*

In answer to your inquiries of the 20th inst., will say:

1. The school buildings, out-buildings and furniture are in good condition. The financial condition, notwithstanding the

depressed times, is excellent. We have an industrious and conscientious corps of teachers. There is a growing interest among the patrons of the schools, and the schools themselves are making fair progress. The liberality of our County Commissioners, notwithstanding the decrease in school resources from nearly every source, has enabled us to keep our schools open the full school year.

2. While we have no high school, (so called) we have two which do the high school work, and ten graded schools which cover most of the ground of high schools.

3. We have thirty-three school libraries with about twenty-five hundred volumes.

On account of insufficient appropriation, the free books are furnished only from the first to fourth grades, inclusive.

ST. MARY'S COUNTY.—*George W. Joy, Examiner.*

LEONARDTOWN, MD., *February 5, 1897.*

In reply to your communication of January 20th, calling for a supplementary report, I beg to submit the following:

We have now forty-three (43) school districts for white children, and twenty-five (25) for colored children. Thirty-four of the white districts and twenty-one (21) of the colored have well built and commodious houses, supplied with proper furniture, and most of these, with out-buildings. Of the remainder, several of the old houses have been repaired and in part finished. There are still a few of the primitive structures with furniture to correspond. While our means at present are not adequate to supplying this deficiency, yet we hope by degrees to supplant these old houses and furniture with new buildings and modern appliances.

Since the commencement of the scholastic year I have visited, with one exception, every school in the county, and while I find much to be commended there is still room for improvement.

Our schools are not as well graded as is desired for effective work, especially in the primary grades. With a view of having uniformity of grading, the examiner proposes to establish a graded schedule, embodying the schedule adopted by the State Board, dividing the work of each grade; promotions to be based upon the result of the examinations in February and June.

The enrollment and average attendance of pupils during the present year have been larger than in any former year.

None of our schools can be properly ranked as high schools, but in several of them high school branches are taught, and they offer the opportunity of obtaining a very fair English education.

It is a matter of regret that we have to report that there is not a school library in our county.

SOMERSET COUNTY.— *William H. Dashiell, Examiner.*

PRINCESS ANNE, *February 8th, 1897.*

In compliance with your recent request, I take pleasure in submitting the following supplement to our annual report for the year ending July 31st, 1896.

The large delegations of citizens appearing before the School Board during the past year asking for new buildings and other improvements, and the large number of petitions on file in this office, indicate the interest felt by the people of the county in their public schools. The School Board has accorded many of the desired improvements, and more will be accomplished as the revenues will justify.

School Buildings. In the principal villages and towns, the buildings are large and comfortable, and in many of the country districts old school houses have been replaced with larger and better ones. In Princess Anne the high school building is of brick, modern in design, and has seating capacity for 300 pupils. In Crisfield there is a large high school building of modern design, a graded school building accommodating 200 pupils, and a good building for the colored graded school. Near Crisfield, to meet the demands of the large tide-water population, a large graded school building has been erected to accommodate 150 pupils. In Fairmount there is a large high school building with an annex. At Deals' Island and other sections the houses are of sufficient size and conveniently adapted to the requirements of the high and graded schools.

The Board has averaged more than three new school houses a year for the last ten years. During the last year the following houses have been built: The graded school near Crisfield, above referred to; a graded school in the fourth district; a large four-room school house for the colored graded school

in Princess Anne; a new primary school house in the ninth district; two new colored primary schools in the third district; suitable out-buildings are included in all specifications for new houses, and I am glad to note that most of the older ones are now not without these conveniences. Our buildings are for the most part equipped with modern furniture.

Attendance. It will be noticed from the statistical part of our report, that the attendance has been larger than the year previous. The enrollment shows an increase of 283, and the average attendance an increase of 98. No doubt the introduction of free books will produce a much larger attendance next year.

Teachers. The teachers of the county are active and interested in their work. The principals of the high schools are for the most part college graduates and most of our graded schools are taught by persons similarly qualified. The teachers of the primary schools are, as a rule, the product of our own schools. It has been our effort to raise the standard of qualification, and certificates are granted only to those whose examination shows intellectual ability. So far as the white schools are concerned, we have but little difficulty in securing suitable instructors; but it is different with the colored schools, and here we have had great trouble. This is not a new state of affairs nor a local one. The State should furnish better facilities in this direction. I understand that there is a Colored Normal School in Balttmore, but I have never met one of its graduates.

Teachers' Institutes. Both white and colored teachers enjoy the benefits of their respective institutes and associations, which are held annually. Our last institute was held at Crisfield and we are indebted to the able corps of instructors of the Normal School for valuable help at this and former meetings. The colored teachers held their institute in Princess Anne at the close of the Spring term.

High Schools. There are five high schools in the county:

County	High	School,	Princess Anne,	4	teachers,	189 pupils.
District	"	"	Crisfield,	4	"	254
"	"	"	Marion,	3	"	121
"	"	"	Fairmount,	4	"	142
"	"	"	Rock Creek,	3	"	103

There are also 16 *graded schools* with 35 teachers and 1,581 pupils. In several sections at the instance of patrons, two or more primary schools have been consolidated into graded

schools at convenient and central points, which have proved of great advantage to their respective neighborhoods.

School Libraries. I regret that I cannot give the exact number of libraries in the county. The two principal ones are at Crisfield and Princess Anne. The former is due to the energy of Mr. F. E. Gardner, principal of the high school, and contains 1,000 volumes; the latter contains about 200 volumes. There are a number of others connected with our graded schools, the number of volumes in each ranging from 25 to 100. The School Board has always contributed the sum of $10 annually to schools raising a similar sum, as the law requires.

TALBOT COUNTY.—*Alexander Chaplain, Examiner.*

We submit herewith the Annual Report of the Public Schools of Talbot county for the year ending July 31st, 1896.

During the school year just closed, our teachers, as a body, are to be commended for their faithfulness and earnest zeal in the discharge of their duties. A larger number than ever before have been diligent students of psychology, pedagogy, and the philosophy of teaching; and the interest in the lectures, instructions and discussions at the monthly meetings of our Teachers' Association, has been constantly increasing. The supplementary work, outside of the text, in many of our schools, is of a high order; and these instructors are making such progress in artistic teaching that it is a real pleasure to visit and work with them. It is difficult for the untrained, mechanical, strict and unsympathetic lesson-monger to realize that the text book is only a book of *texts*, and that it is the *supplementary work* in co-ordinating, correlating, illustrating, etc., which counts most in the training and real education of the pupils. Instead of making the immediate end of the study of the text the power of the pupil to reproduce it from memory, the aim should be rather to secure such a reaction upon the mind of the pupil as will enlarge the mental perspective, train the imagination, reason and judgment, broaden the sympathies, strengthen the will, exalt the sentiments, and in general conduce to the development of intelligence and character.

Reading.

The most noticeable feature in reading during the year is the improvement in readiness and accurate and clear enunciation in the lower grades. Our experience, since teaching a

properly graded system of phonograms in connection with the phonic work in the early stages of this, the most important branch of the child's schooling, has been so satisfactory as to incline us to believe that this method is at last the solution of the problem of primary reading. Any phonic work which fails to make the child not only independent in his reading, but self-reliant, and which does not give him such a key to the language, that no matter how soon his schooling may cease, his ability to read is assured, is not what it ought to be or might be. We find that the phonogram system in phonic work, though slow and somewhat disappointing at first, enables the pupil during the first year and a half of school life to read a greater amount in the time and to acquire a very much fuller vocabulary.

Geography and History.

No special prominence was given to these branches of study, and the general plan of work did not differ materially from that pursued during the preceding year. The teachers, however, have manifested increased interest in correlating them, and in concentrating them with reading, spelling, language lessons, object lessons, and elementary science lessons.

The most common error in teaching history is the attempt to reduce dates and facts to the automatic memory. It exhibits a failure to estimate either the true ends of teaching or the relative values of different kinds of knowledge.

When the broad distinction is made between studies that have a culture value mainly, and those that have a practical value merely, a sharply defined difference of method should be adopted in teaching. Whatever is needed for the uses of daily living should be so well and thoroughly learned that the processes, mental or physiological, should become automatic, such as the mental and physical processes of reading, and largely writing, and of combining small numbers, etc. By frequent repetition all these acts become thoroughly mechanical, and the wise teacher will see to it that her instruction reaches the point where useful acts become fixed and invariable habits. The mistake is made when *history* and *geography*, which are essentially culture studies, are taught with the same end in view—the absolute fixing of this information by frequent repetition, so that it is reproduced with ease and certainty. In culture studies the principle is that of unconscious absorption. All culture studies that have in view the

enlargement of the intellectual horizon, the development of the sensibility, and the guidance and control of the will, should be studied upon the absorptive principle and never by *forced memorizing*, as though they were practical studies. The carrying out of this principle would modify the teaching of history, of geography, and of literature, to a remarkable extent.

Manual of the Public Schools of Maryland.

As a general outline of the work in our public schools, the School Board distributed to the teachers, trustees, and many of the patrons, the "Manual of the Public Schools of Maryland," which was prepared and published by me. The teachers have earnestly and enthusiastically endeavored to follow the suggestions and directions for supplementary work, desk work, language work, elementary science, object lessons, number work, form study, writing, drawing, physical culture, singing, manners and morals, given to them in the manual; and the "Address to Patrons" has been the means of bringing the parents and general public into a broader sympathy with them in their efforts, aims and purposes. The preparation of this little book was first suggested by Prof. M. Bates Stephens, then President of the Maryland State Teachers' Association, in his address before the association at the opening of the annual meeting, July, 1895, and I have much pleasure in tendering my acknowledgment to you, as State Superintendent, for the expressions of your confidence in my zeal and equipment for the work. It is to be regretted that the manual had to be condensed into a convenient size and form for constant reference and study by the teachers. Extended outlines and detail, as well as working models and sketches, had to be omitted; but many teachers and school officers are asking for these, and the work has already been begun by me.

In Conclusion.

In answer to the suggestions of the State Board of Education, in addition to the statistical report and what has been communicated above, we can say, that our buildings, furniture, out-buildings, etc., are modern and ample as a rule, but many just complaints of want of sufficient blackboard surface, working room, and proper conveniences for the care of free books, are still brought to our attention.

The four high schools in our county are fairly equipped with school appliances for the higher work. Eight years ago we introduced drawing into all of the public schools of this

county; and into the central high school in Easton we introduced manual training also. Manual training is not an annex to the school, but is an integral part of its curriculum. The literary course was not abridged in any particular, but manual training was introduced for its educational value alone. The economic side of the matter received from us no consideration whatever. In every scheme of public education provision ought to be made for educating—training—the eyes and hands of our pupils. The training of the eyes and the hands has a direct and beneficial effect upon the training of the intellect, the will, and the sensibilities.

In our white and colored schools, we have twenty-three school libraries; and perhaps 800 volumes would be a proper estimate for all library books in the county, not counting those temporarily loaned to the different schools by teachers, and a small number loaned by pupils. Through the energy, enthusiasm, progressive and professional spirit of the principal teacher, Anna R. H. Miller, Easton Public Colored School has collected one of the largest and best selected school libraries in the county.

In closing, allow me to express to you, as State Superintendent, my appreciation of your courtesy and kindness in our relations, official and personal, and to express my obligation for your interest and cordial support in all of my plans and suggestions for advancing the efficiency of our teachers through our Teachers' Institute and Teachers' Association.

WASHINGTON COUNTY.—*George C. Pearson, Examiner.*

HAGERSTOWN, MD., *January 25, 1897.*

I hereby submit a supplementary report in accordance with your wish.

I. GENERAL CONDITION.

Attendance. The attendance has been very good until the past week, when measles and grip made their appearance in different sections of the county.

1895. Total attend. Fall Term, 7,365; average attend., 5,527.
1896. " " " " 8,055; " " 6,373.

Our Winter term will not close until the 20th of February, therefore, I cannot give you statistics for the Winter term of year ending July 31, 1897.

Buildings. At a few points the old houses should be replaced by new ones: this will be done as soon as sufficient means are at hand. The demand for additional room at populous centers lessens the opportunity for rebuilding more rapidly. The board will not build any house without a cellar for coal, even if drainage is necessary. This reduces the cost of repairs of coal houses.

The school buildings of more than one room are built after new designs. The exterior is intended to be educational as well as the interior, and it is expected that houses built in the vicinity will be more ornamental for the example set forth by the School Board.

Arrangements are made for a bell in the tower. Cases are constructed for the library. Moveable partitions are put between two rooms at least, so that an assembly room may be made by the removal or uplifting of the partition. There are cloak rooms, and for each room the light is admitted so that the child will not receive the light in the eyes directly. Slate black-boards will be found in all of the houses owned by the county.

Furniture. The old pine desk is gradually disappearing, and a more modern desk takes its place. Many of the schools are furnished with new desks.

Outbuildings. These give much trouble to keep clean. I refer to water-closets, as they are the only out-buildings erected, when a new building is constructed. We are endeavoring to have these accord with the law.

Public Interest in Schools. The public interest in schools is greater in the more populous districts, yet in some country districts there are a few families, who take much interest in their schools. Wherever this is the case the school is prosperous. The amount of public interest in schools depends to some degree upon the people who live in the community, but too great freeness of everything in our public schools I fear will diminish this interest.

We hold District Institutes in the different districts, but as these must be held at certain centres, for reasons not necessary to mention, it is impossible to excite much interest in the country schools, but much interest is aroused by these.

Public oral examinations are held in every public school of the county. These are interspersed with literary exercises to attract a larger number of persons. These help to excite interest in town and country alike. These excite more interest outside of Hagerstown than they do in the town. Could

they be held at night in our larger towns, then more people, especially males, could attend.

Corps of Teachers. We cannot complain of our corps of teachers. There should be a longer term of school if we want to keep our good teachers. So many accept more remunerative positions that our corps contains but a very few men and women of long experience. I think that some course of study should be outlined by the State Board, that would lead to work in pedagogy, and thus help to elevate teaching from a vocation to a profession. I also think that summer schools should be opened, where plans and methods should be taught, and exercises be given in those branches or any department of a branch of study, where the Examiner in his annual visitation may see some defect.

Progress and Improvement in the Schools. The teachers have a greater desire to further improve themselves in their preparation for the work of teaching. The people in some sections are beginning to realize the importance of having a strong, central graded school in each district. With the exception of two districts, each election district in the county has at least one graded school. The Board has ordered that an examination shall be held in every graded school in the county, the last school day of the Spring term, at which time any pupil of a school of one room, who has passed through the entire course of the fifth grade, can have the opportunity to take said examination at whatever graded school he may find most convenient for him to attend, and if he passes the examination he shall have a right to attend the school so selected. The purpose of this action is to give better advantages to the more advanced pupils of the country schools, and at the same time to give the teacher a better opportunity to give his attention to the grades below the sixth. The first examination will be held in the early part of the month of May.

Vertical penmanship has been introduced into the first grade. This method of penmanship has been introduced into this grade, where the pupils for the first time commence to write. The work, thus far, has been satisfactory. The only obstruction in the way was that the teacher was accustomed to slant writing.

II. There are two high schools, known as county high schools. Both of these are located at Hagerstown. The course prepares the pupils for entrance to the freshman class

at college, and at some institutions the graduates enter the sophomore class.

Some of our graded schools teach Latin, in truth the majority do, but these are not included among high schools, although they teach Cæsar, geometry, algebra, &c.

III. There are 27 libraries in the county, I can not say what number of books can be found in these libraries, as some schools are even now making purchases.

WICOMICO COUNTY.—*John O. Freeny, Secretary.*

SALISBURY, MD.

In submitting our statistical report, I am also able to report our public schools generally to be in prosperous condition, adopting approved methods, with an increased attendance of pupils over last year.

Some needed improvements have been made in the construction of new and more commodious buildings, to provide for the demand for increased room, and three new schools have been opened.

With few exceptions our houses are in good condition, and provided with suitable furniture.

We feel that our teachers are succeeding fairly well with their work, and are in earnest in their endeavors to instill in their pupils good and substantial educational foundations, in a broad sense, in the essentials embodied in our school system.

It has been the aim of the School Board to add to the course of study, and include higher grades of instruction than those embraced in the primary course, whenever it has been considered practicable to do so.

In very many of our schools this advancement has been made, giving increased facilities and wider scope to the range of instruction.

REPORTS FROM COLLEGES.

The following supplementary reports have been received from colleges and other educational institutions receiving donations from the State:

ST. JOHN'S COLLEGE.—*Dr. Thomas Fell, President.*

ANNAPOLIS, MD., *December 17, 1896.*

In addition to the annual donation received from the State, the General Assembly of Maryland of 1896, appropriated the sum of $5,000 to be expended for general repairs and improvements in the college buildings.

With this sum, a steam power house has been erected for supplying the whole of the buildings with steam heat, which has been satisfactorily accomplished since last October.

Bath rooms, with shower baths and other conveniences, have been added to each of the boarding halls, and the whole system of sewerage has been overhauled and put into good condition.

The character of the work done in all departments of learning has been much strengthened during recent years, so that the course of study pursued at the college is equally as comprehensive as that of other colleges of the highest grade, comprising as it does the departments of ancient and modern languages, mathematics, natural science, mental, moral and social science, history, the English language and literature, military science and tactics, law, shop work, drawing, and engineering.

REPORTS FROM STATE ACADEMIES AND SCHOOLS.

The following circular was mailed to all academies and schools receiving donations from the State:

STATE OF MARYLAND,
Education Department,
BALTIMORE, *January 20, 1897.*

Dear Sir:—I am directed by the State Board of Education to request you to furnish to this office, the following information concerning the institution of which you are the principal, for use in the annual report of said board.

(1.) Name the institution, and the President and Secretary of the Board of Visitors (or Trustees), and also the principal.

(2.) How much money is expended by the board annually, for text books, for apparatus, and for a library?

(3.) Is the institution under the supervision and control of the County School Commissioners?

(4.) How many teachers of your institution are graduates of reputable colleges or Normals schools, and how many are members of any educational association?

Yours respectfully,

E. B. PRETTYMAN,

Secretary State Board of Education.

The following answers in shape for insertion in the State Report, omitting formal address and closing, have been received:

MARYLAND SCHOOL FOR THE DEAF.

Charles W. Ely, A. M., President.

FREDERICK, MD., *January 28th, 1897.*

Your letter of the 20th with inquiries received.

1. This institution is the Maryland School for the Deaf and Dumb. President of the Board of Visitors, Wm. R. Barry, secretary Henry C. Naill, principal, Chas. W. Ely.

2. No specified sum is expended annually for text-books, apparatus and library. The amount varies a good deal from year to year. During the last fiscal year the sum expended for text-books was $124.24, for the library, $119.14, for apparatus nothing.

3. The school is not under the control of the County School Commissioners.

4. Two are graduates of normal training schools, one has passed through two years of the course at Wellesley, others are graduates of academies and special schools, seven are members of educational associations.

CHARLOTTE HALL SCHOOL.

George M. Thomas, A. M., Principal.

CHARLOTTE HALL, ST. MARY'S CO., MD., *January 22, 1897.*

Replying to your communication of 20th inst., I respectfully submit the following:

Charlottee Hall School was incorporated by Act of Assembly in 1774. The trustees held their first meeting in the same year at "Cool Springs," but did not meet again until the close of the Revolutionary War.

The school was first opened January 1, 1797, and has never suspended operations. It is now in the second century of its active existence.

The real estate of Charlotte Hall School embraces 325 acres of land, with numerous buildings: as school hall, steward's house, white house, principal's house, gymnasium and lavatory. The State of Maryland gives a donation of $3,600 a year, of which $1,600 is perpetual so long as the school is continued.

The main building, used for school work, was burned February, 1896. The loss has been promptly supplied by a handsome brick structure just completed at a cost of $11,000. The last Legislature generously appropriated $5,000 for this work.

The Washington and Stonewall Society has a library approximating 2,000 volumes. The school library contains about 500 old and curious volumes of little practical use.

No money has been expended this year by the Board for apparatus or library. Text-books are purchased by the students.

Charlotte Hall School is under a board of twenty trustees; ten from St. Mary's county and ten from Charles county. Col. John F. Dent is president of the Board and George M. Thomas is secretary and treasurer pro tem.

The present faculty is composed of the following:

George M. Thomas, A. M., principal, graduate of the Virginia Military Institute.

J. F. Coad, A. M., vice-principal, graduate of Loyola College.

J. Felix Fenwick, graduate of St. John's College.

W. T. McPherson, graduate of Charlotte Hall School.

ROCKVILLE ACADEMY.

W. Pinckney Mason, U. S. N. A., Principal.

ROCKVILLE, MD., *January 22, 1897.*

In response to yours of the 20th inst., I write to say that this institution is known as the "Rockville Academy," the president of its board of trustees is Mr. H. W. Talbott, and the principal is W. P. Mason.

I do not know that any stated sum is appropriated by the board of trustees for text books, apparatus, and library.

The institution is not under the control of the County School Commissioners.

All the teachers of this school are of the best higher educational institutions in this country, such as the University of Virginia, U. S. Naval Academy, &c., &c.

WEST NOTTINGHAM ACADEMY.

John G. Conner, Principal.

COLORA, CECIL COUNTY, MD., *January 22, 1897.*

In compliance with the request of your circular letter, I beg leave to submit the following report for this academy:

President of Board of Trustees, Hon. Jacob Tome, Port Deposit, Md.; Secretary, Rev. D. E. Shaw, Colora, Md.; Principal, John G. Conner, A. M.

The Board does not furnish free text books. For reference books and apparatus, I should say about $50.00 annually. The great need of this institution has been suitable buildings. This has been partially met by the erection, last summer, of a house for the principal and boarding students, costing $3,000.

The school is not under the control of the County School Commissioners.

The principal is a graduate of the Bloomsburg (Pa.) State Normal School, and of Lafayette College. The assistant is a graduate of the George school, near Philadelphia. The teachers belong to the National Educational Association.

It is the belief of the trustees that the school is in better condition than for many years.

MILLINGTON ACADEMY.—*Henry Tonkin, Principal.*

MILLINGTON, MD., *January 25, 1897.*

In reply to the questions asked in your letter of the 20th inst., I submit the following:

1. The name of the institution is The Millington Academy. The President of the Board of Trustees is James R. Jones, and the principal, Henry Tonkin.

2. There has been no money expended for apparatus or library. The State appropriation has been applied to the payment of the teachers' salaries.

3. The school is under the supervision of the County School Commissioners.

4. None of the teachers are graduates. The principal and first assistant have been teaching in the school about twenty-nine years, and the second assistant about eighteen years. All are members of the Public School Association of Kent county.

HAVRE DE GRACE HIGH SCHOOLS.

Charles T. Wright, Principal.

HAVRE DE GRACE, MD., *January 27, 1897.*

Replying to yours of 20th inst., I will say that so far as in my power, I furnish the desired information.

1. Havre de Grace Public and High School.

President Board of District Trustees, Dr. J. H. Cochran.

President of County School Board, Dr. M. H. Jarrett.

Principal of school, Chas. T. Wright.

2. This must be obtained from County Superintendent, J. D. Worthington.

3. It is under the supervision of the County School Commissioners of Harford county.

4. Four are graduates of Maryland State Normal School.

Vice-Principal not graduate, but educated at Dickinson Seminary.

Principal, not graduate, but educated at Western Maryland College, and holds from that institution the degree of A. M., on the strength of work done as an instructor there.

ELKTON ACADEMY.—*Charles C. Holden, Principal.*

ELKTON, MD., *February 1, 1897.*

In answer to the circular of January 20, 1897, asking for certain information in regard to the Elkton Academy, I would report as follows:

1. The name is The Elkton Academy. It is managed by a board of trustees, twelve in number, the president of the board, at this time, being George Ricketts, Elkton, Md., and

secretary, George A. Blake, Elkton, Md. The present principal is Charles C. Holden, a graduate of the University of Virginia.

2. The amount spent for text books, etc., varies, averaging from $25 to $50.

3. The institution is not under the control of the County School Commissioners.

4. There is no assistant.

BEL AIR ACADEMY.—*Albert S. Cook, A. B., Principal.*

BEL AIR, MD., *February 2, 1897.*

Answers to enclosed questions, are as follows:

(1.) Bel Air Academy and Graded School. President Board of Trustees, John Moores. Secretary Board of Trustees, J. M. Streett.

(2.) *Nothing* for apparatus and library. Text books belong to the county, and an academic book fee is charged.

(3.) It is under the control of the County School Commissioners.

(4.) A. S. Cook, Principal, Shippensburg (Pa.) State Normal and Princeton University. D. Edw. Long, Vice-Principal, Shippensburg (Pa.) State Normal. Miss Annie E. Offley, 1st assistant, Trenton (N. J.) State Normal. Misses Minnie Lee Chase, Lydia A. Robinson, Blanche F. Archer, Maryland State Normal School.

ST. JOHN'S LITERARY INSTITUTION.

W. W. Walsh, Principal.

FREDERICK, MD., *February 8th, 1897.*

In response to yours of January 20, I beg leave to say that:

1. The name of the school is "St. John's Literary Institution." The name of the President of Board of Visitors, Rev. John J. O'Rourke, S. J. The name of the Secretary of Board of Visitors, Rev. Wm. H. Walsh, S. J.

2. About $100 a year is expended for library, &c.

3. The school is not under the control or supervision of the County School Commissioners.

4. The principal is a graduate of the College of L'Argentiere, Rhone, France. The head teacher is a member of the Society of Jesus, a teaching order. The second teacher is a graduate of Union College, Schenectady, New York.

UPPER MARLBORO' ACADEMY.

Thomas J. Grant, Principal.

UPPER MARLBORO', MD., *February 6th, 1897.*

The following is the desired information asked for in your letter of January 20th.

1. The Upper Marlboro' Academy; Mr. C. C. Magruder, president, Mr. Frederick Sasscer, secretary and Thomas J. Grant, principal.

2. The trustees spend no money for library, text-books, etc. For expenses and salary in the academic department they expend $800. In the junior department $400 is used during the scholastic year.

3. The institution is not under the control of the County School Commissioners, but the patrons of the school elect seven (7) trustees, and they have supervision over the teachers.

4. The principal is a graduate of St. Charles College and his assistant a graduate of the academy.

ALLEGANY COUNTY ACADEMY.

J. E. Edwards, Principal.

CUMBERLAND, MD., *January 22, 1897.*

I beg to submit the following in reply to yours of the 20th inst.

1. Institution, Allegany County Academy. President Board of Trustees, T. L. Patterson. Secretary Board of Trustees, R. R. Henderson. Principal, J. E. Edwards.

2. No regular fund for apparatus or library.

3. The school is not under the supervision and control of County Commissioners.

4. Three teachers are college graduates, one a Normal school graduate.

CHURCH HILL ACADEMY.—*Thomas B. Johns, Principal.*

CHURCH HILL, *February 9, 1897.*

I enclose you answers to inquiries, as follows:

1st. Church Hill Academy. President, W. E. Temple. Secretary, James Brown.

2. Varies,—$20 last year, $45 in 1895.

3. It is under the supervision of County School Commissioners.

4. Two are college graduates, three are members of educational associations.

EAST NEW MARKET ACADEMY.

W. P. Beckwith, Principal.

EAST NEW MARKET, MD., *February 8, 1897.*

In reply to the request of the State Board of Education, made through you, concerning the institution, of which I am principal, I would say:

(1.) The name of the institution is, "The East New Market Academy. The board of trustees of the academy proper, composed of five of the most prominent and influential patrons of the school. Mr. R. H. Stevens was the president of the board of trustees, 'till his death on January 25, 1897. At that time Mr. W. E. Johnson was secretary and treasurer. After the death of Mr. Stevens, Mr. W. E. Johnson was elected president, and Mr. Jos. E. Henry was elected secretary and treasurer of "The East New Market Academy" at a meeting of the trustees held on January 30, 1897. Wm. P. Beckwith is the principal.

(2.) I can only approximate the amount of money spent for books, etc., annually, because we have never kept any account of the money thus spent. I think that it will average from $50 to $60 in the academy proper.

(3.) "The East New Market Academy" proper, is under the management and supervision of the board of trustees, (five in number) known as a State Board of Trustees of "The East New Market Academy."

(4.) W. P. Beckwith, the principal, is a graduate of Washington College, Chestertown, Md., class of 1880.

The following are the teachers under the supervision of the public school officers and 3 trustees appointed by the County

School Board, viz: Mr. Thomas Leckie, St. John's College, Annapolis, Md.; Miss Alice Webster, Maryland State Normal School, Baltimore, Md.; Miss Ida Bramble, Seminary, E. N. Market, Md.

I do not know that Mr. Leckie will continue longer than April 1, 1897. He was appointed as a relief for present emergency caused by an unusually large attendance during the months of January, February and March, after which time many of the farm boys retire to farm labor. He was appointed about the 25th of January, by the School Commissioners. The principal is the only one appointed by the trustees. All of the public school teachers are appointed by the School Commissioners for Dorchester County, Md. The principal is appointed by the joint action of the five trustees of the State Board and three trustees of the County Board. The principal has the supervision of all the departments at present, and receives a compensation from the County School Commissioners. This arrangement was made by the State Board of the Academy and the School Commissioners, the School Commissioners agreeing to furnish rooms, etc., for the academy proper, and to contribute to the salary of the principal. The State Board entered into this agreement at the solicitation, I understand, of the School Commissioners, years ago, at which time the State Board of Trustees (of The East New Market Academy" proper) retaining the privilege and power of withdrawing whenever harmony should cease to exist between them in the appointment of the principal, etc. Now the principal must receive a majority of the board of eight trustees to secure the appointment. Success has attended the school under this arrangement so far.

ARBOR DAY.

Arbor Day was observed by all the public schools of the State, on the tenth day of April, 1896 in pursuance of the following proclamation by His Excellency, the Governor:

ARBOR DAY PROCLAMATION.

EXECUTIVE DEPARTMENT,

ANNAPOLIS, MARYLAND.

WHEREAS, by Joint Resolution of the General Assembly of Maryland, adopted in 1884, the Governor is authorized and directed to issue a Proclamation annually designating a day

in April for the planting of forest trees, to be known as Arbor Day,

Now, therefore, I, LLOYD LOWNDES, Governor of the State of Maryland, do hereby designate Friday, the 10th day of April, 1896, as Arbor Day, and I recommend that the day be devoted by the people of the State to the planting of forest trees, and I especially recommend to parents and to teachers in public schools, that they encourage their children, or those under their influence, to plant or transplant at least one forest shade tree on that day by the side of a public road or about their school-houses or homes.

It is hoped by the observance of this custom to counteract the evil effects resulting from the rapid destruction of forests in our State, and to maintain that due proportion of forest land which is essential to the comfort, health and convenience of every country.

THE GREAT SEAL OF MARYLAND.

Given under my hand and the Great Seal of Maryland, at the City of Annapolis, on the seventeenth day of March, A. D., 1896.

LLOYD LOWNDES, *Governor.*

By the Governor:

RICHARD DALLAM,
Secretary of State.

The following was the Arbor Day program at the Maryland State Normal School:

Gifts that grow are best;
Hands that bless are blest;
Plant: Life does the rest!
Heaven and earth helps him who plants a tree,
And his work its own reward shall be.

—*Lucy Larcom.*

PROGRAM.

EXERCISES IN THE MAIN HALL.

HYMN.—Come ye Faithful, - - - - - - *Mozart.*

RESPONSIVE READING - - - - - - *Psalm CIV*

READING OF THE GOVERNOR'S PROCLAMATION,

ASSOCIATIONS.

THE MARYLAND STATE TEACHERS' ASSOCIATION held its *thirtieth annual session*, at Deer Park hotel, at Deer Park, Garrett Co., Md., July 14th, 15th and 16th, 1896, in accordance with the following program, which was substantially carried out:

OFFICERS.

President—Chas. F. Raddatz, Baltimore city.
First Vice-President—J. T. Hutchins, Anne Arundel.
Second Vice-President—John D. Worthington, Harford.
Recording Secretary—Albert F. Wilkerson, Baltimore city.
Corresponding Secretary—Miss Lillian W. Barkdoll, Washington.
Treasurer—Alexander Chaplain, Talbot.
Executive Committee—E. B. Prettyman, Baltimore city.
E. L.Boblitz, Frederick.
F. S. Everist, Cecil.
H. J. Handy, Worcester.
F. Eugene Wathen, Anne Arundel.

PROGRAM.

Tuesday, July 14th.

Opening session - - - - - - - - - - - 7.30 P. M.

Music—Address of Welcome—Hon. Gilmor S. Hamill, Oakland.
Response—Prof. M. Bates Stephens, Denton, Caroline County.

Music—President's Address—Prof. Charles F. Raddatz, Baltimore City College.

Music.

Wednesday, July 15th.

Morning session - - - - - - - - - 9.30 o'clock.

Music—Paper—"A Study of a Forgotten English Poet," Henry S. West, Baltimore City College.

Music—Paper—"History in Our Public Schools," J. N. Zimmerman, Williamsport.

Paper—"Physical Culture," Miss Flavia A. Welby, Easton.

Discussion—Opened by Prof. Alexander Chaplain.

Music.

Evening Session, - - - - - - - - - 7.30 o'clock

Music—Address—De Warren H. Reynolds, Esq., Cumberland.

Paper—Prof. R. W. Silvester, Maryland Agricultural College.

Music—Paper—"Immortelles in Poetry," Prof. John T. White, Cumberland.

Recitation—Miss Harriette Brown, Baltimore city.

Music.

Thursday, July 16*th.*

Address—Hon. Lewis Putzel, Baltimore city.

Music—Recitation—Miss Harriette Brown, Baltimore city.

Music—Business Meeting—Election of Officers.

Music.

The following excellent report of the proceedings of the Association is taken from the columns of the Baltimore *Sun:*

PUBLIC EDUCATION.

The State Teachers' Association.

FIRST DAY.

DEER PARK, MD., *July 14, 1896.*

The annual meeting of the State Teachers' Association is largely attended. The opening session was held in the Deer Park Hotel tonight. Prayer was offered by Rev. Dr. Arthur Evans, of Cumberland. The musical program was directed by Prof. Charles Rabold, of Cumberland. He was assisted by Mrs. John W. Avirett and the Misses Shepherd, of Cumberland.

ADDRESS OF WELCOME.

Mr. Gilmor S. Hamill, of Oakland, welcomed the Association in an address, in which he spoke forcibly of the importance of the teacher's calling, the need for better compensation and the necessity of support by parents in sympathy and encouragement. He declared himself in favor of larger appropriations for schools and compulsory education. His excellency, Governor Lowndes, also added a most cordial welcome to teachers and friends of the association.

EXAMINER STEPHENS.

Mr. M. Bates Stephens, secretary and examiner of public schools for Caroline county, made the response to the address of welcome, in the course of which he discussed the public school system, and advocated "compulsory education." Mr. Stephens said:

"There are some who doubt whether the wisdom of those who framed the school law is appreciated to that extent which the excellence of the law justifies, and at times we apprehend that those of us into whose hands the management of the school system has been confided are not as ready to have its provisions well understood and generally appreciated or as zealous to defend its merits against adverse criticism as the worth of the system warrants. I will venture the assertion that every school examiner of this State first entered upon his official relations with the school system, convinced of many glaring defects in the law and with a belief that many changes had to be made before the school system could attain to its highest efficiency. These opinions were formed before we had placed ourselves within the administration of the law. They were the offspring of observations made from

without and before any serious investigation had been made of the merits of the system.

"But in the light of investigation and experience, from observations made from within, these objections have melted away like the dewdrops before the morning sun. The truth of the matter is the more we study its provisions, the more closely we observe its working, the stronger will become the conviction that when every one connected with it is performing his proper functions, is honestly living up to what the law expects of him, no State school system of this country is entitled to greater public favor and support or is better calculated to produce good results. As a people, collectively, we have regulated our schools and as individusls we make war on our own regulations. Not only is the control of the schools absolutely in the hands of the people, but the people themselves, by and through their legally appointed representatives, made the law. It represents the sovereignty of the people and is of binding force on every citizen entitled not merely to his obedience, but his hearty support as well. Our school patrons must be brought to a closer knowledge of the school law and its workings; they must be convinced of the superiority of our school system and be brought into closer touch and sympathy with school interests in general. When this is done the opposition they have encouraged will disappear and the indifference now manifest in our school communities will be turned to support.

"Had this part of the work been well done by us, who are the agents of the system, there would have been no demand on the last General Assembly to have school commissioners elected by popular vote instead of being appointed by the Governor. Had that bill become a law, although it may have remained on our statute books but a short time, its evil consequences would have blighted the educational progress of this State for at least ten years. Under the law of appointment, whether by the judiciary or the executive, there have been brought to the administration of our schools as school commissioners the best men of the State—men who are highly intelligent, representative in their character, of splendid business qualities and noted for integrity. No department of public affairs in this State is better managed than our public schools. But should the law be changed as was proposed you will drive from the service this class of men, who would not humiliate themselves to seek nominations through the machinations of modern political conventions, further

embarrassed by the strain of a campaign, whose methods are sometimes questionable. In their places you would have an entirely different class. They would in many cases be just such men as are willing and anxious to accept any one hundred dollar office. This bill would exchange men of honor, brains and character for such political mediocrity as must be satisfied with a nomination of some sort from political conventions. No greater calamity could befall the efficiency of our school system than to have this medium between the State authorities and the people weakened by such a departure.

"Another bill, however, became a law which will greatly facilitate public school work. I refer to the free book bill. Whatever may have been individual opinion concerning the expediency of such a measure, no one denied that free books to all pupils will improve the standard of school work and be the means of placing the schools of the State on a higher plane of excellence and usefulness. The adoption of free books in itself will benefit our schools, but a greater benefit to public interest lies in the fact that their provision to all children removes every obstacle in the road of public school education and throttles every excuse for allowing children to grow up in our communities ignorant of the fundamental studies and devoid of school discipline. No assessment in this State is more cheerfully paid than the school tax. Our people are wonderfully liberal in their appropriations for public education, for those who are patrons of our schools know that it is of the highest importance for their children to receive a fund of useful knowledge and be trained in those habits of thoughts which are essential to a right sort of preparation for the duties of a useful life. They know that the public schools were designed to accomplish this end. But some of our large taxpayers are not school patrons. Their benefit is not so direct, yet they do not ask to be relieved from their share of the burden. They want ignorance and its necessary accompaniments reduced to a minimum in our communities, and of all the factors to bring about such a result they know that the public school is the most important and influential.

"But we cannot render unto our taxpaying citizenship the greatest returns for their investment until we bring beneath the benficent influence of our school system all boys and girls and teach them, at least, the elementary branches of our school curriculum. Comfortable and attractive school houses

are scattered all over this State; these are supplied with competent teachers and now completely equipped with free text books. It will be a reflection on the educational polity of our State and a rebuke to the liberality of our taxpayers if we do not compel the attendance of those who have heretofore avoided our instruction on the grounds of expense or some such flimsy pretext. Compulsory education, sounds somewhat harsh, but that is the very idea we mean to encourage by this reference.

"All that has been said touching the nobility of the high calling of the teachers meets with a warm response in the heart of every educator present. This association has continually sought to exalt the position of the teacher. The teacher is, after all, the school, and the school the teacher. Without this force all other allied forces slumber like the chemic forces of the plant, till quickened by the light. Our teachers are appreciating more every year the scope of their work, and the extraordinary demands made on teaching. They are crowding our summer schools for teachers; our normal school has an unprecedented enrollment, and there is an increasing demand for pedagogical works. School trustees are becoming more cautious in the selection of teachers, for they now demand that they possess not alone knowledge, but must have skill and special fitness for the work. The field from which teachers are to be selected, must not be prescribed by partisan politics or denominational religion.

"This association has also kept in view the true aim of school work. The fads and theories of educational fanatics have no place in our schools, for as representatives of the people in the school system we must recommend only such measures as experience approves and common sense dictates. We do not mean to claim that our schools cannot be improved. Great improvements are making and more will follow. But it is one thing to relieve the difficulties of a good and useful school, and another to increase without improving the labors imposed upon it. There is a growing sentiment in favor of the essentials of education. Social, financial, and international problems are today dividing our people, which must be solved through the right education of the people. The State which largely furnishes the means has a right to expect as a result of our work citizens who have been taught to think accurately—able to draw proper conclusions from the premises in hand. When all of our citizens cast their ballots, influenced by intelligent conviction, these

questions now dividing our people will be settled. We urge again, what it has been our privilege to do before to this association, that we cannot give too much prominence nor attach too much importance to those studies which reach after and develop the thought power of our pupils.

"It is gratifying to have present the members of the new State Board of Education. They are the head of our educational system. We not only seek their acquaintance but their co-operation in all matters pertaining to this meeting. If our information be correct, they will perform while here the most important and delicate duty devolving upon them, the election of a secretary and State superintendent of schools. I appreciate the delicate position I am about to assume by this digression, but the keen interest I feel in public education in Maryland, and the pride I take in the rapid progress of school work impel me to suggest, with their permission, that he who has led the educational forces of this State for the past six years against the common enemy, who has shown undoubted attachment to the work, and splendid qualification for leadership, who maintains the dignity of his position whether at home or abroad, who by his affable and courteous manners has won the admiration of our teachers, and who enjoys the confidence of the people of the State, regardless of class or party, I repeat the suggestion that Hon. E. B. Prettyman may continue to lead us in our effort to raise the intellectual standard of this State."

Address of President Raddatz.

President Charles F. Raddatz, professor of German in the Baltimore City College, made the annual address. Among other topics of live educational interest, Mr. Raddatz dwelt specially upon the value of modern languages in the high schools of our State. He quoted largely from eminent pedagogical and educational authorities to show that a study of the modern languages would not only afford the student most salutary mental discipline and opportunity for broader culture, but be of the greatest practical utility to him in life."

SECOND DAY.

Deer Park, Md., *July 15th, 1896.*

The second day's meeting of the State Teachers' Association was well attended, and the interest in the proceedings unabated.

Under the title of "A study of a Forgotten English Poet," Professor Henry S. West, of the Baltimore City College, brought to remembrance the almost forgotten author, George Wither, the famous satirist and pastoral poet of the first half of the seventeenth century, who wrote the song, "Shall I Wasting in Despair." By presenting a brief sketch of Wither's life and character, and appreciative selections from his best poetry, he showed that in the present time of revived study of other Jacobean poets this old author deserves grateful remembrance.

Prof. J. N. Zimmerman, of Williamsport, read a paper concerning the teaching of history in our public schools, in which he insisted upon the great importance of this branch and presented some excellent views regarding fruitful methods of securing the interest of the pupil and adequate results in mental discipline and culture.

"Physical Culture" was the title of a bright paper written by Miss Flavia A. Welby, of Easton, Md., and read by Professor Chaplain, of the same town. Miss Welby called particular attention to the Swedish or Ling system of gymnastic exercises, and also to the beneficial effect of physical exercises, set to music. Professor Chaplain and others discussed the paper.

The address of DeWarren H. Reynolds, of Cumberland, the paper of Prof. John T. White, of Cumberland, and the recitations of Miss Harriette Brown, awakened the interested attention and elicited the hearty applause of the audience.

The paper of Prof. John T. White of the Cumberland high school, was very enjoyable. He reviewed many of our best poets, and after brief allusion presented a gem from the writings of each.

Mrs. Charlotte Newell, teacher of history and literature in the Jacob Tome Institute, presented a brief but interesting sketch of the institute and the excellent work it is doing. This school was opened two years ago with an excellent faculty and a superb equipment for manual training as well as literary culture. There are now attending the school over five hundred pupils, ranging from the kindergarten to the high school in qualifications, and in the admission of pupils all treated exactly alike.

Dr. Reed, president of Washington College, of Chestertown, Md., addressed the Association in the interests of the normal department of that college. The Legislature at its

last session established this department, gave $5,000 to aid in the erection of a building and made an annual appropriation of $1,000 toward its support. Its graduates are empowered to teach in Maryland without examination. The trustees are erecting a building for its accommodation at a cost of $12,000. One free scholarship for tuition is given to each county of the Eastern Shore.

THIRD DAY

An Election for Officers.

Addresses by Prof. H. D. Beachley, Prof. D. Melvin Long, Milton G. Urner, John S. Wirt, James M. Monroe, Louis Putzel and others—Discussion of the Free School Book Fund and its Distribution—Final Adjournment.

Deer Park, Md., *July 16.*—Interest in the exercises of the Maryland State Teachers' Association continues unabated. In fact, it is to these exercises that the members present must look entirely for entertainment as well as mental pabulum, rain having fallen almost unceasingly since the beginning of the session. The rain, of course, rendered any explorations of the natural beauties of the region out of the question.

The music rendered by Professor Rabold, Mrs. Avirett, Mrs. Eoff and the Misses Shepherd, and the recitations of Miss Harriette Brown have therefore been especially grateful.

In the absence of Prof. Charles F. Raddatz, who left Wednesday night for his trip to Europe, Mr. John D. Worthington, examiner for Harford county, presided over the session today.

Study of the Classics.

A paper of Prof. H. D. Beachley, of Thurmont, read at today's session, dealt with "The Function of Classics in a Liberal Education." Study of the classics the professor thought to be liberalizing and humanizing, and absolutely necessary to a complete and symmetrical development of the mind. He claimed for Latin and Greek a prominent place in our high school curricula, and challenged comparison between the classically trained and others even in successes attained in the practical affairs of life. He quoted Charles Dana as saying: "If I could have my way, every young man who intends to be a newspaper man should study Greek and Latin in the old-fashioned way."

Development by Cultivation.

Prof. D. Melvin Long, of the Trappe High School, read a paper entitled "Human Plants and Plant Food." In this essay the author compared the development of the child's mind through education to the development of the plant through cultivation. In the one is the embryo man, with all his mental, physical and moral perfections; in the other the germ of nature's beneficent and beautiful products. That teacher alone can truly so be called whose judgment and care place this human plant under the best conditions for its completed and perfected development.

Mr. Urner's Views.

Milton G. Urner, who was to have read a paper on the parent and the school, was unable to be present, but sent a letter of regret. In this letter he declared himself in favor of longer sessions for those county schools which are not kept open ten months in the year, higher salaries for teachers and local self-government in educational matters. He believed that every institution receiving State aid should be a part of the State public school system.

John S. Wirt on Public Education.

The address of John S. Wirt, of Cecil county, dealt with the magnitude of the nation's public school system, the importance of its work and the considerations that should govern the appointment and retention of teachers. In this more than in any other branch of public service, selections should be made on the ground of superior fitness, and neither partisanship nor nepotism should have the slightest influence upon the appointing power. He emphasized the opinion that the State is not responsible for the religious instruction of its children, but that absolute freedom must be secured to them in this respect. If it is insisted that the Bible be read in the public school it should be rather as a literary than as a religious exercise.

Knowledge and Education.

James M. Munroe, of Annapolis, Md., read a most able paper entitled "Knowledge and Education." The acquisition of knowlege, he affirmed, is not education, but a means to that end. Not every one is capable of being educated, but only he who can think deeply, feel strongly and act nobly. Man is a trinity of body, mind and soul and a perfect training cannot neglect the moral side of his nature, and the

spiritual is even greater than the physical. With many the acquisition of knowledge has become an indulgence precluding independent activity and complete command of mind. He agreed with Hiram Corsen that it is a question how to secure a maximum amount of education with a minimum amount of brains. [Laughter.] Co-education of sexes is an excellent thing in a spiritual sense, and man owes much of his moral insight to the feminine element of his nature. The eloquence, scholarship and sympathetic tone of Mr. Munroe's paper evoked deep interest and hearty applause.

Enlightened Public Opinion.

Mr. Louis Putzel, of Baltimore, prefaced his address with the famous quotation from Washington's farewell address: "Promote then, as an object of primary importance, institutions for the general diffusion of knowledge. In proportion as the structure of a government gives force to public opinion, it is essential that public opinion should be enlightened." Mr. Putzell's theme was "The State and the School." He said in part the problems that will hereafter confront our people will probably be social and economic ones, and our future citizens should be prepared to solve them intelligently. Our teachers and school authorities must note altered conditions, and adjust the means of instructions to meet a grave public need. In a government where there is equality of power, independence of thought and reason must be developed. This is the teacher's work. He should create in his pupils, love and veneration for our institutions and have them better understood. Their strength lies in the fact that they bring out the best in man, offer the widest scope for development and employment of the best faculties in the individual. Education should further strive to show that discontent is unreasonable, to teach a higher conception of life. The strivings of the soul, the exaltation of the mind, the emotions of the heart, truly constitute life.

Library Laws.

The association adopted the report of Dr. Bernard Steiner, chairman of the committee on library and library laws, which disclosed the unsuccessful efforts of that committee to secure from the Legislature of the State an Act enabling municipalities to establish and support public libraries. The committee, consisting of Dr. Bernard Steiner, Dr. Fell, of Annapolis; Professor Raddatz, of Baltimore; and Professor Chaplain, of Easton, was continued for another year.

Free School Book Fund.

Some sharp argument arose over an unsuccessful attempt to commit the association to the expression of an opinion regarding the apportionment of the free school book fund. The question was brought up because of declared inequalities in the distribution of the public school tax under the Acts of 1870 and 1872.

Officers Elected.

The following officers were elected for the ensuing year: President, Prof. E. B. Prettyman, State Normal School; first vice-president, W. S. Crouse, St. Michael's; second vice-president, George C. Pearson, Hagerstown; recording secretary, A. F. Wilkerson, Baltimore; corresponding secretary, Miss S. E. Richmond, Baltimore; treasurer, Alexander Chaplain, Easton. Executive committee, John T. White, Cumberland; E. L. Boblitz, Frederick; F. S. Everist, Port Deposit; A. E. Sudler, Sudlerville, Queen Anne's county; Samuel Garner, Annapolis.

The convention adjourned.

The Association of School Commissioners and Examiners of Maryland held its annual session at the State Normal School Building in Baltimore, November 24th and 25th, 1896. In the absence of the president, Mr. Samuel Dutrow, Mr. Francis S. Everist, presided, with Mr. M. B. Stevens, secretary.

The executive committee presented the following program which had been previously mailed to each member:

OFFICERS:

President, - - Samuel Dutrow.
1st Vice-President, I. S. Wilson.
2d Vice-President, F. S. Everist.
Secretary, - - - M. B. Stevens.
Treasurer, - - George C. Pearson.
Executive Committed: { E. B. Prettyman, H. A. McComas, H. G. Weimer.

PROGRAM.

1. Outlining the grade work in our public schools.

Paper - - - - - - Alexander Chaplain, Easton.

DISCUSSION.

George Biddle.....Elkton.
Thomas S. Stone.....Aquasco.
E. L. Boblitz.....Frederick.
Wm. C. Somervell.....Prince Frederick.
Wm. H. Dashiell.....Princess Anne.

GENERAL DISCUSSION BY THE ASSOCIATION.

2. The best way of executing the Free Text-Book Law.

Paper - - - - - Dr. James L. Bryan, Cambridge.

DISCUSSION.

Charles B. Rogers.....Towson
F. S. Everist.....Port Deposit.
W. G. Smith.....Chestertown.
U. G. Palmer.....Oakland.
Henry A. Wise.....Baltimore.
Dr. L. M. Shipley.....Ellicott City.
George A. Davis.....Westminster.
C. D. Luckett.....Rockville.
John D. Worthington.....Bel Air.
John O. Freeny.....Salisbury.
G. W. Joy.....Leonardtown.
John E. McCahan.....Baltimore.

GENERAL DISCUSSION BY THE ASSOCIATION.

3. The Public Lands of the United States should be sacredly devoted to the advancement of public education.

Paper - - - - - - E. B. Prettyman, Baltimore.

DISCUSSION.

H. G. Weimer.....Cumberland.
John S Wilson.....Catonsville.
Dr. E. A. Sudler.....Sudlersville.
R. W. Silvester.....College Park.
Dr. C. W. Reid.....Chestertown.
Dr. Thomas Fell.....Annapolis.
John P. Clark.....Mt. Washington.
Rev. J. C. Nicholson.....Baltimore.
I. S. Wilson.....Upper Marlboro.

GENERAL DISCUSSION BY THE ASSOCIATION.

4. What is the proper method of apportionment of the $150,000 annual appropriation under the Free Text-Book Law?

Paper - - - - - George C. Pearson, Hagerstown.

DISCUSSION.

Louis L. Beatty.....Centreville.
Dr. John F. Ireland.....Lower Marlboro.
H. O. Devries.....Marriottsville.
F. Eugene Wathen.....Annapolis.
Z. P. Wharton.....Stockton.
Joseph M. Cushing.....Baltimore.
Wm. H. Shepherd.....Cumberland.
Ephraim G. Polk.....Princess Anne.
Z. C. Ebaugh.....Reisterstown.

GENERAL DISCUSSION BY THE ASSOCIATION.

5. The consolidation of rural schools, and the transportation of distant pupils at the public expense.

Paper - - - - - H. A. McComas, Hagerstown.

Discussion.

Thomas M. Carpenter.....La Plata.
Dr. Thomas Y. Franklin.....Snow Hill.
J. S. Jamesson.....Westernport.
Dr. Samuel A. Graham.....Salisbury.
Dr. J. W. Laughlin.....Deer Park.
Dr. W. W. Duvall.....Prince George's.
M. B. Stephens.....Denton.

General Discussion by the Association.

6. The President shall cause the Roll of the Counties and Baltimore City, to be called to give an opportunity for the presentation of resolutions for the benefit of the Public School System of the State.

7. Inspection of the State Normal School, November 25th, at one o'clock P. M.

8. Luncheon, November 25th, at two o'clock, P. M.

The minutes of the proceedings as kept by the secretary of the association are as follows:

State Normal School Building.

Baltimore, Md., *November 24, 1896.*

The Association of School Commissioners and Examiners for the State of Maryland met at 10:45 o'clock, A. M. In the absence of president Samuel Dutrow and first vice-president J. S. Wilson, second vice-president, Frank S. Everist, presided. A call of the roll showed a small percentage of the members present. The secretary read the minutes of the last meeting, which were approved. The committee on the oyster question asked for further time in which to make their report, which was granted. Prof. E. B. Prettyman, Secretary of the State Board of Education, made his report of statistics for the schools of Baltimore city and the various counties of the State, as reported to him by annual reports from County School Boards for the fiscal year ending July 31, 1896.

Prof. Alexander Chaplain, Examiner of Talbot county, made an address on outlining the grade work in our public schools, in which he spoke earnestly of the importance of outlining the grade work as the best means of school economy and school efficiency. The matter was further discussed by George Biddle, of Cecil; Thomas S. Stone, of Prince George's; E. L. Boblitz, of Frederick; W. H. Dashiell of Somerset; E. B. Prettyman, of the Normal School; John D. Worthington, of Harford.

Dr. James L. Bryan, of Dorchester county, read a valuable paper on "The best way of Executing the Free Text-book Law." The paper was discussed by Charles B. Rogers, U. S. Palmer, C. D. Luckett, John D. Worthington, Thomas S. Stone, George Biddle, George C. Pearson and E. L. Boblitz.

On motion, the following committee was appointed by the chair, to report tomorrow appropriate resolutions on the death of John C. Bannon, late Examiner of Anne Arundel county, viz: James A. Diffenbaugh, William H. Dashiell and M. B. Stephens.

The treasurer of the association, Mr. George C. Pearson, read his annual report, which was, on motion, accepted and approved.

On motion, the association adjourned to meet at ten o'clock A. M., tomorrow.

M. B. STEPHENS,
Secretary.

BALTIMORE, MD., *November 25, 1896.*

The association met at ten o'clock, with vice-president Frank S. Everist in the chair. Minutes of previous session were read and adopted. There was a large attendance of members from every part of the State. Prof. E. B. Prettyman read an interesting paper, the subject of which was "The public lands of the United States should be sacredly devoted to the advancement of public education." The speaker reviewed the history of legislation relative to the public lands, and pointed out the important part Maryland had taken whenever the question was considered by Congress; and also of land grants for the support of public schools in the trans-Alleghany States. The paper was discussed by H. G. Weimer, of Allegany, John S. Wilson, of Baltimore county, Rev. J. C. Nicholson, of the State Board of Education, and Dr. J. L. Bryan, of Dorchester.

Dr. Bryan offered the following resolutions which were adopted:

Resolved, That the State Board of Education are requested by this association to urge action by the Congress of the United States to consider the propriety of appropriating the proceeds of the public lands to the public schools of the Union.

2. That our own senators and representatives in Congress are requested to give this matter speedy and earnest attention.

The committee appointed to prepare resolutions on the death of John C. Bannon, made the following report, which was unanimously adopted.

Whereas, It has pleased an allwise Providence to remove from our midst our late associate and co-laborer John C. Bannon, and, whereas, we recognized in him those qualities of heart and mind which endeared him to us all, and, whereas, it is an appropriate and grateful duty for this Association to notice formally such sad event:

Therefore be it resolved, That while we bow in humble, yet reverential submission, to the will of Him who doeth all things well, in thus taking from our midst our esteemed friend, yet we no less deplore his loss and sympathize with those who are bereaved by his death.

Resolved, That as a fellow member of our Association, he gained our esteem by the kindness and cordiality of his disposition and by his readiness to co-operate in all our labors.

Resolved, That these resolutions be placed on the record and a copy of same forwarded to the bereaved family.

George C. Pearson, of Washington county, read a valuable paper on "What is the proper method of apportionment of the $150,000, annual appropriation under the Free Text Book Law." Mr. Pearson denounced the present system of distributing the school book fund and suggested three plans, one of which must be adopted. The paper was discussed by Joseph M. Cushing, of the State Board of Education; John D. Worthington, of Harford county; Dr. Jas. L. Bryan, of Dorchester county; Chas. B. Rogers, of Baltimore county; H. G. Weimer, of Allegany county; George R. Ash, of Cecil county; E. B. Prettyman, of the Normal School; and His Excellency, Governor Lowndes, President of the State Board of Education.

The following communication was read from the Wm. J. C. Dulany Company.

BALTIMORE, MD., *November 25, 1896.*

To the School Commissioners' Association of the State of Maryland:

GENTLEMEN—We have been urged at various times to publish a school journal which will be primarily in the interest of the schools and educators of this State.

We are specially desirous of getting the judgment of your body as to the desirability of issuing such a work. To make

it a success, it is necessary we have the hearty co-operation and aid of the County Boards, as without them the journal could not be a success.

We, therefore, ask that the matter be thoroughly considered and if deemed advisable to issue, that you will take such action as will give us a reasonable guarantee of the desired aid.

Very respectfully,

Wm. J. C. Dulany Co.

Mr. H. M. Hebden explained the objects of such a journal. The matter was discussed by John D. Worthington, Col. Charles B. Rogers, M. B. Stephens and Thos. S. Stone. Geo. R. Ash offered the following resolution relative to school journal, which was adopted:

Resolved, That it is the sense of this association, that it is highly desirable that a State School Journal be published, and that we pledge ourselves to give all possible aid and encouragement to the enterprise, both as an association and as representatives of the various County Boards.

The following recommendations for the good of the school system were made upon the call of the roll by Dr. J. L. Bryan, of Dorchester county:

Recommendations for the consideration of the committee on program for our session in November, 1897:

1. Sufficient *State* funds to pay all teachers' salaries.

2. Salaries of all teachers throughout the State to be arranged between the State Board of Education and the City and County School Boards.

3. County funds to pay strictly local expenses of school houses, furniture, fuel, etc. County supervision by School Board.

4. Separation of the offices of State Superintendent and Principal of the State Normal School.

5. Separation of the offices of County Examiner and Secretary and Treasurer of the County Boards.

6. Obligatory annual sessions of Teachers' Institutes and Associations in all of the counties of the State.

7. The consolidation of rural schools, and the transportation of distant pupils at the public expense.

The following committee was, on motion, appointed to report nominations for officers of the association for the

ensuing two years, viz: W. H. Dashiell, H. G. Weimer and Thos. S. Stone.

The committee reported as follows:

We hereby nominate the following list of officers for election for the next two years, viz:

President, - - F. S. Everist.
1st Vice-President, Duncan Sinclair.
2d Vice-President, Dr. G. T. Atkinson.
Secretary, - - M. B. Stephens.
Treasurer, - - George C. Pearson.
Executive Committee: E. B. Prettyman, H. A. McComas, H. G. Weimer.

Which report was adopted and said nominees elected.

The association adjourned to the Assembly Hall of the State Normal School, where recitations were given by students, and an address was made by his Excellency, Governor Lowndes.

The association was then entertained at a luncheon in the new gymnasium, upon the invitation of the State Board of Education.

M. B. STEPHENS,
Secretary.

CONCLUSION.

The most important advance in the cause of public education in this State, during the last school year, was made by the passage of laws by the General Assembly of 1896, chapters 135 and 165, providing for furnishing the use of text books free of cost to the pupils of the public schools of the State, and making the annual appropriation therefor of one hundred and fifty thousand dollars. It is already apparent from the reports from the school officers of the several counties on file in this office, that the beneficial effects claimed for these laws have been realized. The attendance of pupils has increased from ten to thirty per cent. and the efficiency of the schools has been greatly increased. The Report of the Comptroller shows, it is true, that the levy of two cents on each $100 for this purpose is not sufficient, but the financial affairs of the State are in so good a condition, and the State debt so small, as indicated by the same Report, that there is reason to expect that as the State debt is diminished, the State

levy for public school purposes will be increased. It is to be hoped, also, that the frank and emphatic statement of the Comptroller will be kept in mind, that the apportionment of the $150,000 was made by him "in strict conformity with the laws applicable to the same," and according to the construction of the language used in the law, which has prevailed in the Treasury Department of the State for the past twenty-four years; and that "If there be any inequalities in the law, the Legislature is alone responsible, and alone has the power to correct them." It is, perhaps, proper for me to say, that according to my understanding, the criticisms of school officers on this subject, were intended for a single provision of the law, and not for the Comptroller. It is my opinion, from a knowledge of the views of those most interested in the subject, that an amendment of section 3 of chapter 135 of the Laws of 1896, by striking out the words, "as the State School Tax is now apportioned," and inserting, in lieu thereof, the words, "to the several counties and the city of Baltimore, in proportion to their respective population between the ages of five and twenty," would be satisfactory to all school officers and to the public.

I beg to call special attention to, and to urge the careful reading of, the supplemental reports of the Examiners of the several counties contained in this report. The clear and full statements therein, upon the most important aspects of our school system, will interest the public, and give valuable information. The best results in the several counties, and the means productive thereof, should incite to improvement in other counties. It will be noticed that, as the county is the unit for the administration of our school system, and as in each county, the salaries of teachers holding like certificates are the same, with a slight variation according to attendance of pupils, and as the requirements for obtaining certificates are the same, all the schools in any county should be of the same character and efficiency, and that our State system results in a nearer approach to uniformity of all its schools than is the case in many other States, where the schools in cities and large towns are good, but the "rural schools" are poor. It is, of course, true that our schools may be and should be improved, and such is the opinion and the desire of school officers, especially where the schools are in the best condition.

In the annual sessions of the association of school officers, it has been suggested by thoughtful members, and is well

worthy of careful consideration that our school laws should provide for an additional and higher grade of teachers' certificates, viz., a high school certificate. The school officers in some counties have availed themselves of the provisions of the school laws concerning high schools to a considerable extent, and the establishment and maintenance of these exceedingly important institutions is growing, in obedience to enlightened public opinion.

It has been repeatedly urged also, that there should be a separation of the duties of the Principal of the State Normal School from those of the State Superintendent of Public Instruction. It is manifest in the present condition of the public school system of the State, after the experience of thirty years, and considering its gradual but steady development, that one person cannot perform the duties pertaining to the two positions named. The State Normal School during the year included in this report, had on its roll the names of 414 students, the largest number in any year of the history of the school. It is impossible for its Principal to give it proper attention, and also attend a Teachers' Institute in each county of the State, visit the high schools, conduct the voluminous correspondence of the education department, prepare the annual State report and perform the other duties now required by law. He is obliged continually to elect between conflicting duties. This is the only State in which such manifold duties are united in one officer.

It has long been evident that the salaries of our teachers are inadequate remuneration for their expense and labor in preparing for their professional duties, and for the very important services which they render to the public.

The last session of the Association of School Officers, by formal resolution, unanimously adopted, requested the State Board of Education to urge action by the Congress of the United States, through our Senators and Representatives, looking to the just and equitable distribution among all the States, of the proceeds of the public lands—the common property of the citizens of the Union—for purposes of public education: The trans-Allegany States having had their public schools magnificently endowed from said lands, whilst Maryland has never received one cent therefrom for the maintenance of its public schools. It will be gratifying to the members of said Association to be informed that the State Board of Education has appointed a committee for that purpose, with Governor

Lowndes as chairman, and has also expressed the intention to bring to the attention of the next General Assembly, through its legislative committee, all the pressing needs of the public school system. It is respectfully urged that all school officers aid in the formation of such public opinion throughout the State as will sustain the efforts that will be made to secure proper results.

It is with the profoundest sensibility and the highest appreciation, that I respectfully tender to all the officers and teachers of the public school system with whom my duties have brought me into association, my grateful acknowledgement of their uniform courtesy and thoughtful kindness.

It would be doing injustice to my own deep sense of what is due, and to what would be expected by all who have participated in the school affairs of the State, were no mention here made of one who was for many years past always in the front rank of ardent and intelligent workers in the cause of public education in the State, and who has very recently been called by Divine Providence from labor to reward. This is not the time for adequate tribute to the exalted character and unselfish devotion to duty, of our late friend and brother, Francis S. Everist. The State Association of School Commissioners and other school officers, of which he was the honored and unanimously chosen president, will doubtless, at its next meeting, record and publish a proper estimate of his worth, and join in sad but grateful acknowledgement of his services to the State, and in tender expression of our esteem and affection for him as a true and sincere friend, in which no one can unite more sincerely and with a deeper sense of personal loss than myself.

E. B. Prettyman,
Secretary State Board of Education.

CECIL COUNTY.

OFFICE OF SCHOOL COMMISSIONERS OF CECIL COUNTY, MARYLAND.

ELKTON, MD., *September* 5, 1896.

PROF. E. B. PRETTYMAN,

My Dear Sir:—Herewith find report for Cecil County for year ending July 21, 1896. At this date we have under construction five new school houses. One a high school at Elkton, with a capacity of over 300 scholars, one at Cherry Hill, capacity of 128, one at Zion, capacity 64, one near Rising Sun, (stone), capacity 64, and one for colored children near Earleville.

In the High School, scholars will be received from all parts of the county, beginning with those of the seventh grade, and will prepare for the sophomore year of any of our colleges.

Our County Commissioners sold bonds to amount of $1,000, for this school, at a premium of $600. This sum ($10,600) I received on the last day of July. As it was received so late and will be expended during the coming year, I did not include it in the annual report.

The balance on hand seems large, but it is an apparent rather than a real balance, as it will be used to pay contracts already made.

We have trouble to secure trustees who will take the oath of office now required by law. We fail to see any good resulting from the law, and would not regret its repeal.

We held two Teachers' Institutes during the year, one for the white and one for the colored teachers. Each was a success, and our thanks are due for efficient aid rendered by the professors of the Normal School, and John D. Worthington, examiner, of Harford county.

I am, very truly yours,

GEORGE BIDDLE.

F. S. EVERIST, Port Deposit,
GEO. R. ASH, Elkton,
JOHN R. WHITE, Oakwood,
Commissioners.

SUMMARY OF SCHOOL STATISTICS.

FOR SCHOOL YEAR ENDING JULY 31, 1896.

	1896.	1895
Number of school houses owned by the County, 89; rented, 5; total 94	94	93

Repairs	36 19	
		$ 3,466 80

KENT COUNTY.

PROF. E. B. PRETTYMAN,
Secretary State Board of Education.

The tables herewith give you about all the information there is to give you.

The schools progressed satisfactorily during the year. Up to August 1, but few of the trustees of schools had taken the oath of office. The suggestion is again made to change the time of appointing trustees, to January instead of May. An Act of Assembly to this effect passed the Senate at the last session of the Legislature, but failed in the House for want of time.

During the school year, Commissioner Geo. W. Davis died, and his unexpired term was filled by the appointment of Mr. Jos. W. Harper. Commissioner Scott's term expired with July. Mr. Cornelius C. Brown was appointed by the Governor to the vacancy.

The board elected Commissioner Brown, President, and appointed Mr. William G. Smyth Secretary-Treasurer and Examiner.

EBEN. F. PERKINS, *late Secretary.*

SUMMARY OF SCHOOL STATISTICS.

FOR SCHOOL YEAR ENDING JULY 31, 1896.

	1896.	1895.
Number of school houses owned by the county, 53; rented, 1; occupied, 10; total, 64	64	64
Frame, 61; brick, 3; total, 64	64

QUEEN ANNE'S COUNTY.

Centreville, Md., *September 1st*, 1896.

PROF. E. B. PRETTYMAN,
Sec'y State Board of Education.

Dear Sir:—I herewith submit my report of the Public Schools of Queen Anne's County, for the year ending July 31st, 1896.

Notwithstanding the depressed financial condition existing during the year, we have been able to keep our schools open the *full* time. Our houses, schools and finances are in good condition.

I am very truly yours,
L. L. BEATTY.

APPENDIX.

EXTRACTS FROM THE BY-LAWS

—OF THE—

STATE BOARD OF EDUCATION.

The following classification and schedule of studies shall be observed in all Primary and Grammar Schools, and in those classes of High Schools to which they are applicable:

First Grade.

1. Reading and spelling from Chart or Blackboard; reading or spelling Primer, or First Reader. 2. Writing capitals and small letters from copies on blackboard. 3. Counting objects. 4. Writing figures as far as 100. 5. Adding, subtracting, multiplying and dividing by 2, 3, 4, orally, and by written work. 6. *Drawing.* 7. *Object lessons.* 8. *Singing.*

Second.

1. Reading and spelling to the end of Second Reader. 2. Writing words and sentences from blackboard and from Second Reader. 3. Writing and reading figures as far as 1,000. 4. Adding, subtracting, multiplying and dividing by 5, 6, 7, 8, 9. Mental Arithmetic. 5. *Drawing.* 6. *Object lessons.* 7. *Singing.*

Third.

1. Reading and spelling to the end of Third Reader. 2. Copying on slates the lessons of the Reader, and exercises in Dictation. 3 Spelling, one-half of Primary Spelling-Book. 4. Writing and reading figures as far as millions. 5. Addition, subtraction, multiplication and long and short division. Mental Arithmetic. 6. Writing in Copy-Book, Nos. 1 and 2. 7. Language lessons begun. 8. Oral lessons in Geography, including the Maps of Maryland and the United States. 9. *Drawing.* 10. *Object lessons.* 11. *Singing.*

Fourth.

1. Reading and spelling to the end of Fourth Reader. 2. Primary Spelling-Book completed. 3. Copying of lessons in Fourth Reader. Reading from slates the lessons copied; Dictation and reproduction exercises. 4. Elementary Arithmetic, through Fractions. Mental Arithmetic. 5. Writing Copy-Book, Nos. 3 and 4. 6. Primary Geography, with Oral lessons and Map Drawing. 7. Language lessons continued. 8. *Drawing.* 9. *Object Lessons.* 10. *Singing.*

Fifth.

1. Reading and spelling, Fifth Reader, alternate with History of Maryland and of the United States. 2. Writing lessons in Fifth Reader from Dictation. 3. Spelling—advanced Spelling-Book. 4. Arithmetic, 2d book

☞ Subjects in *italics* are recommended, but are not obligatory.

completed. Mental Arithmetic. 5. Writing—Copy-Book, No. 5. 6. Language lessons continued, with Composition and Letter Writing. 7. Grammar—Parsing and Analysis of easy sentences. 8. Advanced Geography. 9. Elementary Physiology. 10. *Drawing.* 11. *Singing.* 12 *Needle-work* and *Domestic economy* (for girls.) 13. *Elements of Agriculture,* when ordered.

Sixth.

1. Reading and spelling to end of Fifth Reader, alternate with History of Maryland and of the United States. 2. Spelling—Advanced Spelling-Book completed. 3. Practical Arithmetic completed. Mental Arithmetic. 4. Writing—Copy-Book, No. 6. 5. Advanced Grammar. 6. Geography completed. 7. Lessons in Composition and Letter Writing. 8. Physiology completed. 9. *Drawing.* 10. *Singing.* 11. *Needle-work* and *Domestic economy* (for girls.) 12. *Elements of Agriculture.*

Time Table.

Each grade may have four daily recitations, as follows:

1st.	1 lesson of 15 minutes and three of 10 minutes each				—45	minutes.
2d.	"	"	"	"	—45	"
3d.	"	"	"	"	—45	"
4th.	2 lessons of 15 minutes each and 2 of 10 each				—50	"
5th.	"	"	"	"	—50	"
6th.	1 lesson of 20 minutes and 3 of 15 minutes each				—65	"

The available portion of the remaining hour, and the time that may be gained by the absence of all pupils in any grade, may be spent in general exercises, or in studies above sixth grade, when there are pupils sufficiently advanced.

High Schools.

8. The High School course shall begin with the completion of the sixth grade, and may include all the studies required for admission into the Freshman class at college.

9. No school shall be classed as a High School unless it contains at least two grades higher than the sixth.

10. The following schedule of studies is recommended for adoption in the High Schools and the higher classes of graded schools.

Seventh.

1. Arithmetic reviewed. 2. Algebra (Wentworth's or Robinson's) through Equations of the first degree. 3. Geometry (two books of Wentworth, or an equivalent)—Geometrical Drawing. 4. Physical Geography. 5. English Grammar—Morris's "Elementary Lessons"—Parsing and Analysis of "Paradise Lost," Book I. 6. Practical exercises in Composition. 7. English History—Green's "Short History." 8. Latin Grammar and Reader. 9. Book-keeping. 10. Physiology—(Martin's Human Body.)

Eighth.

1. Algebra through Equations of the second degree, and Progressions. 2. Geometry, Plane and Solid, completed. 3. Natural Philosophy. 4. Rhetoric. 5. Modern History. 6. Latin—Cæsar "De Bello Gallico," three books. 7. Physiology completed.

Ninth.

1. Plane Trigonometry and Surveying. 2. Chemistry. 3. Botany. 4. Ancient History. 5. English Literature (Sharw's). 6. English Language (Lounsbury). 7. Elocution. 8. Latin—Virgil's Æneid, four books; Sallust —"The Conspiracy of Catiline."
